New Administrative Structure Soon; Hotel Planned

The two biggest stories at Auburn this summer are the proposed changes in the organization structure of the university and the building of a new conference center and hotel across the street from the university library.

Few specifics about the new organization of the university are yet available other than the timetable for the committee, appointed by President James E. Martin at the end of spring quarter, to complete its work. The committee, made up of faculty and administrators and chaired by Executive Vice President George Emert, began work in early June. Dr. Emert reported in early July to the Faculty Senate that the committee expects to have its recommendations to Dr. Martin within weeks so that he can review them, seek further input from across campus, and make a final recommendation to the Board of Trustees by late August. The Faculty Senate, composed of a representative of every department, division, and organizational unit of the university, expressed concern that not enough time would be given for faculty input. The Senate was particularly concerned because many Auburn faculty members work on a nine-month basis and are not on campus during the summer.

Dr. Emert stressed that reorganization had been strongly recommended by the Southern Association of Colleges and Schools, by the AU Self-Study of 1982, and by other evaluations. "The Southern Association of Colleges and Schools expects a report from us by September 1, 1984," he said. After further discussion the Senate voted without dissent to ask the president to "allow ample time for the faculty to study and react to the proposed changes" before he presents them to the Trustees.

In addition to Dr. Emert, the committee is made up of Paul Turnquist, agricultural engineering; Curt Peterson, botany and microbiology; Wayne Flynt, history; Robert Hebert, economics; Fred Molz, engineering; James Buford, cooperative extension; Gerald Leischuck, institutional analysis; Pat Barnes, dean of students; and Judy Kohl, pharmacy administration.

The other big story of the summer is the preliminary agreement between Auburn University and Algernon Blair, Inc., of Montgomery to construct a large hotel on College Street across from the Ralph Brown

Draughon Library. The site of the hotel, which is expected to offer between 130 and 170 rooms as well as facilities for meetings, is currently occupied by four fraternities. If the project meets final approval from the Board of Trustees, the fraternities, which are located on land owned by the university, will be relocated.

The project is expected to cost around \$12 million and Dr. Martin calls the proposed new hotel "a real boost for many campus programs, providing space for conferences and seminars conducted by the Department of Continuing Education and many other departments on campus. We think this is a major step forward for Auburn University and the City of Auburn."

Several hotel chains are being considered for operation of the hotel which could be under construction before the end of 1984 and completed in late 1985.

Horton Resigns as Business Dean

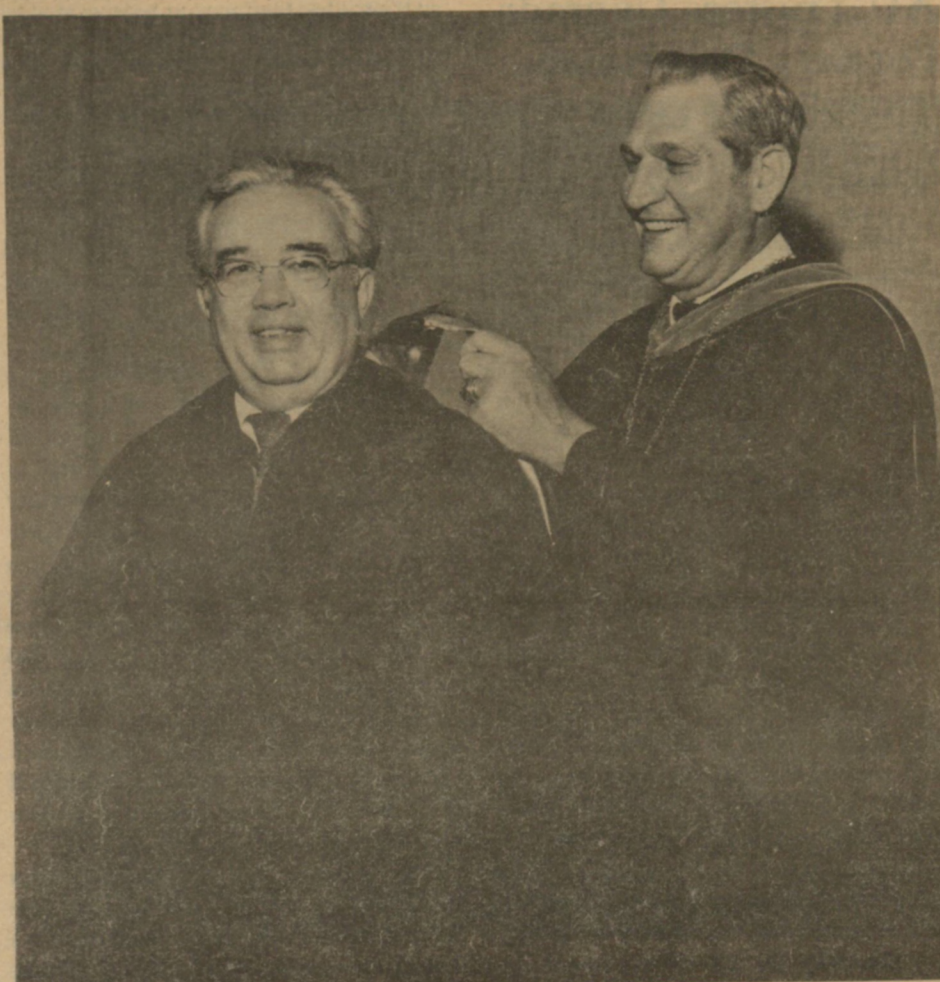

George R. Horton, who has served as dean of the School of Business since 1973, has announced plans to give up his position as dean and return to full-time teaching. He will continue to serve as dean until Sept. 30, when he will go on professional improvement leave until Dec. 31. After that time, he will become professor of marketing and transportation.

"During his years as dean, George Horton has rendered outstanding service to the university," stated university president James E. Martin. "He was only the second dean that the School of Business has had and has given it strong leadership for 11 years."

Dr. Martin stated that a major contribution made by Dean Horton was his leadership in achieving full accreditation for the school by the American Assembly of Collegiate Schools of Business in 1980.

"Dean Horton has worked tirelessly in developing quality programs in the School of Business and has been able to attract a large group of distinguished teachers to the university," said Dr. Martin. "Under his guidance, Auburn's department of economics ranks 42nd out of 240 programs in a recent survey."

"There is no way that I can adequately express the university's appreciation to Dr. Horton for his leadership and devotion to the university. I know that he will continue to serve the institution with the same enthusiasm that has marked his entire career."

HONORARY DEGREE—Dr. Buris R. Boshell '47, recognized nationally and internationally for his contributions to medical science with advances in the treatment of diabetes, was awarded the honorary doctor of science degree in commencement exercises in June. President James E. Martin (right) confers the degree with the symbolic placing of the hood. Dr. Boshell earned his bachelor's degree at Auburn and began the study of veterinary medicine before changing to human medicine.

Dr. Horton was named dean of the School of Business at Auburn in 1973 following a nationwide search. When appointed dean, he was serving as head of the Department of Marketing and Transportation, a position he assumed in 1970. He became a member of the faculty in that department in 1968 and was elected by the students later as the outstanding professor in the School of Business.

Prior to his first appointment at Auburn, Dr. Horton taught at the University of Georgia at Athens and at the University of Virginia. He also has broad experience in industrial supervision and business consulting, and is widely known in the business community.

He has published a large number of papers based principally upon his research and studies in the field of transportation.

He holds the B.S. and M.S. degrees from Auburn University and the Ph.D. from the University of Virginia.

He is a member of a number of honor and professional societies, including: Phi Kappa Phi, Omicron Delta Kappa, Beta

Gamma Sigma, Kappa Phi Kappa, Alpha Phi Omega, Delta Nu Alpha (transportation), Pi Sigma Epsilon (sales), Omicron Delta Epsilon (economics), and Delta Sigma Pi (business).

Dr. Martin announced that an acting dean will be named while a search is underway for a permanent replacement for Dr. Horton.

Scholarship Honors Ben T. Lanham, Jr.

The Ben T. Lanham, Jr., Memorial Scholarship in Agricultural Economics has been established by Bernice A. Lanham in memory of her husband. The scholarship will be awarded annually to one or more students in agricultural economics.

Dr. Lanham, who died in 1983, joined the Auburn faculty in 1939 as an assistant professor. In 1956 he was appointed head of the Department of Agricultural Eco-

nomics and in 1964 became associate director of the Agricultural Experiment Station and assistant dean of the School of Agriculture. In 1966 Dr. Lanham became Auburn's first vice president for research and in 1972 he was appointed vice president for administration. Dr. Lanham retired in 1979 due to ill health.

Auburn President James E. Martin, who studied under Dr. Lanham, remembers well his classes and said, "I am grateful today for the broad spectrum of knowledge and insight I gained under him. Dr. Lanham was the kind of professor students sought to emulate. Loyalty and distinction characterized his long career of service to the university and he had a unique influence in that he served in almost every conceivable faculty and administrative capacity.

"We deeply appreciate the generosity of Mrs. Lanham and her family in providing for this new scholarship."

AU Trustees Upgrade Forestry Department To School Status

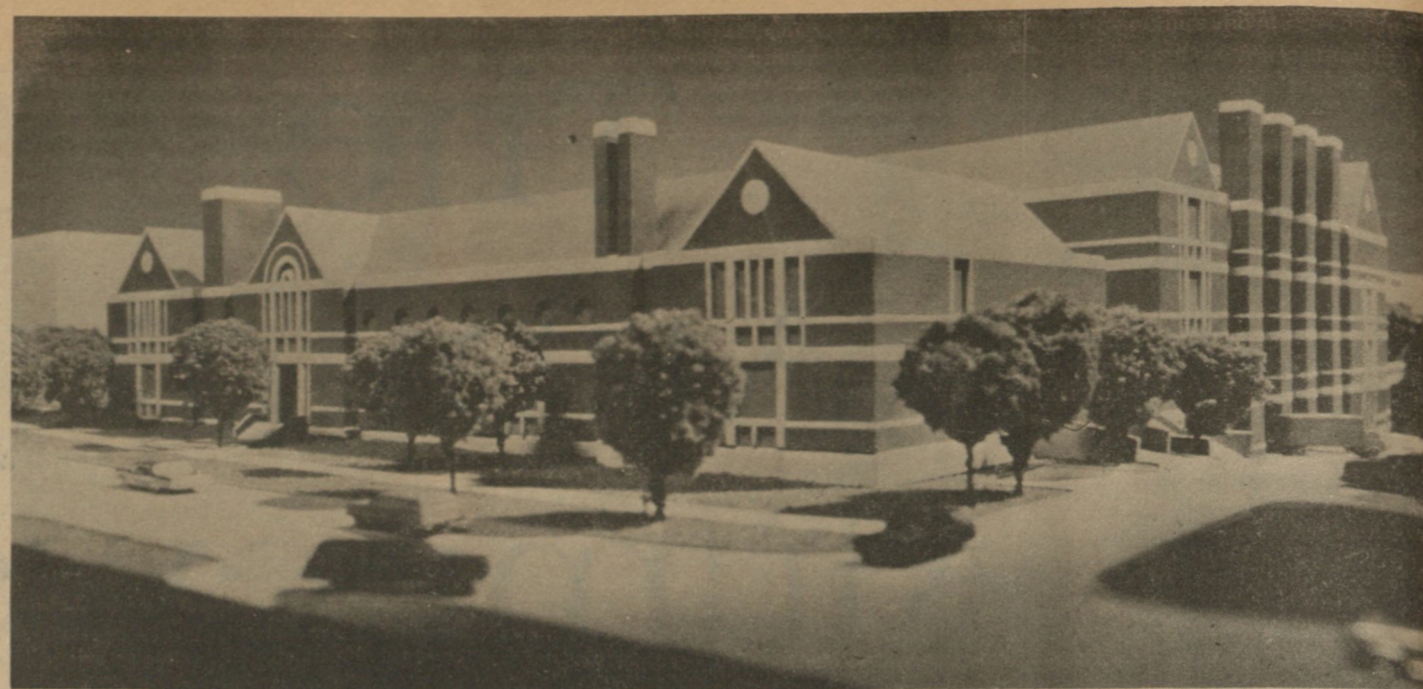

By Sam Hendrix

Auburn's Board of Trustees voted June 4 to upgrade the University's Department of Forestry to school status. The department was established in 1947, and there had been interest in upgrading to a school for several years according to Dr. Emmett Thompson, head of the Forestry Department.

"We've had interest among the faculty, industry, and alumni in a School of Forestry since the department was created, but until recently the time hasn't been appropriate," Dr. Thompson said. "But with the experts all agreeing that the world's brightest area for forest development potential is the Southeastern United States, and with Alabama having the second largest timberland base and second largest forest products industry in the region, we need to be structured to take advantage of this opportunity."

The administrative structure and cost of Auburn's 11th undergraduate school will be determined over the summer by University hierarchy. Dr. Thompson admits the immediate impact of the School will be in its higher visibility rather than in classroom improvement. "It's hard to say we'll do a better job educating our students," he said. "But over the long haul I feel we'll do a better job recruiting faculty and retaining quality faculty. The move to a school is a visible move that shows that Auburn University feels forestry is important. If we can recruit better faculty and graduate students as a result of this, then we'll likely have a better program."

Several reasons for the upgrading exist, but the primary reasons are that Auburn's is the state of Alabama's lone university forestry department and that the state relies heavily on the forest industry. "Two-thirds of Alabama's land area (22 of 33 million acres) is classified as commercial forest," Dr. Thompson said. "Only Georgia among Southeastern states has more." The forest products industry is Alabama's largest industry with an annual value of more than \$1.5 billion and sales over \$4 billion. Alabama's forest products industry is second in size to Georgia's among regional states, but is growing more rapidly than

FUTURE CIVIL ENGINEERING HOME—Construction is expected to be underway by the end of July on the new home for the Department of Civil Engineering. Auburn University Foundation President Ben S. Gilmer '26 announced that the Birmingham-based construction firm of Brasfield and Gorrie had been given an order to proceed on construction. The building, depicted above in artist's rendering, will be located on the site of Broun Hall, which was torn down earlier this year. Because of its location in the campus historic district, the architects, Golemon & Rolfe Associates, Inc., designed the building to blend with the traditional facades of nearby Samford, Hargis, and Langdon Halls. Alumnus John Harbert, III, '46, a graduate of the civil engineering program, gave the Auburn Generations Fund the money for the building as a part of his \$5 million pledge to the School of Engineering building needs. The building will include administrative offices and research and teaching labs.

Georgia's. "Upgrading forestry's academic structure at Auburn is the next logical step toward providing forestry education and research in Alabama so that we can get the most out of this industry," Dr. Thompson said.

For the state's forest industry to continue to develop, Alabama needs forest management and forest products graduates. Southeastern schools of forestry are located at several campuses, none of them convenient to Alabama residents or students: North Carolina State, Georgia, Clemson, Virginia Tech, Mississippi State, and Florida. In addition to prospective students, the more than 1,000 licensed foresters and 200,000 private forest land owners in the state look to Auburn for technical expertise when regenerating their land or dealing with whatever problems arise. School status will give Auburn forestry personnel greater flexibility in serving these individuals.

Dr. Thompson also noted that the matter of hiring and retaining the best possible faculty played a role in upgrading Auburn's Department of Forestry to School. Unlike some other academic disciplines, according to Dr. Thompson, forestry does not have a surplus of top quality faculty. Therefore, for Auburn's forestry program to be competitive with other regional programs, the University needs every possible advantage to recruit the best available faculty. Potential professors, as well as others interested in forestry education and research, view academic structure as an indication of a university's overall commitment. Upgrading to a school, which most of the other Southern forestry programs are under, will help Auburn's faculty recruiting efforts.

"We want to retain the best ones," Dr. Thompson said. "I'm not at all complaining about our current faculty, but in the past we've lost a couple of people who might've stayed otherwise."

Another factor in the decision to upgrade is that the Southeastern United States is rapidly becoming the forestry center of the world, and U.S. manufacturers are competitive in world markets. The Southern region has the greatest potential to expand both home and foreign markets, so now is the perfect time for Auburn's forestry pro-

gram to expand as well. If current trends continue, Alabama will have the region's largest forest products industry before the end of this century, and development and expansion of Alabama's forest products industry will definitely benefit the state's economy.

Auburn's forestry program has been a department within the School of Agriculture, Forestry, and Biological Sciences. Degrees offered include bachelor's degrees in

forest management, forest products, and forest engineering, a Master of Science and a Master of Forestry; and a Ph.D. Since 1947, approximately 1,000 individuals have received forestry degrees, and 161 students are currently enrolled in forestry studies at Auburn. All plans for the new School of Forestry will be announced toward the end of the summer, and the school will be included in the budget for fiscal year 1984-85.

JOURNALISM GRAD HONORED—The Auburn Chapter of Sigma Delta Chi, the Society of Professional Journalists, recently presented its first Award of Excellence to Henrietta Worsley Davis '35 of Auburn. Mrs. Davis was one of the first women to join Sigma Delta Chi when women were admitted in Alabama in 1970. She began her newspaper career immediately after graduation and after several years with various other newspapers she was associate editor of *The Auburn Bulletin* for 34 years.

New Engineering Building Open

"The Electrical Engineering Department has moved to 200 Broun Hall . . ." clicked an electronic voice over the phone. The beginning of summer quarter opened the doors of the new electrical engineering building which had been under construction since April 1982. "It's exciting for us," says Engineering Dean Lynn Weaver of the new Broun Hall equipped with 100,000 square feet of classrooms, labs, and offices. "We just can't stop now—we're just beginning," he adds, explaining that on the site of the old Broun Hall the new civil engineering building will begin construction this summer. It should be completed by fall of 1985.

The new Broun Hall was sorely needed. For the past several years the Electrical Engineering Department enrollment has increased fifteen percent per year. Adding the number of computer science majors to the current number of electrical engineering majors means that the two areas comprise ten percent of the entire Auburn student body—a staggering number of students for a department that has been using approximately the same facilities since 1967.

The first floor provides a variety of facilities for the engineering students, including a study area with four small offices for student engineering organizations, a kitchenette, vending and convenience area, as well as a student project area which will be the responsibility of students desiring to use the equipment and who can reserve the room on a 24-hour basis. Along with the student facilities are six climate-controlled rooms containing digital computer systems, a seminar room with a seating capacity of fifty, and a laser lab with a 24-foot air-suspended table for mounting purposes.

Other attributes of the building include a 300-seat auditorium on the second floor with a retractable wall capable of dividing the room in half and numerous labs

equipped to hold sixteen stations of five foot tables, enabling students to have individual set-ups. On the fourth floor is the microelectronic lab that, because of its special air filtering system, requires anyone entering the premises to don a lab coat. On the roof are three set-ups for antenna and various wave frequency testing. On every floor provisions have been made for the handicapped, and the building's lighting system was designed and implemented by engineering professor Dr. James Lowry to provide the desired intensity and location of light in each room.

Faculty Notes and News of Interest

DR. GALE A. BUCHANAN, dean and director of the Alabama Agricultural Experiment Station, has been named a Fellow by the Weed Science Society of America for his many "accomplishments in research, teaching, and service." He has been on the Auburn faculty since 1965, becoming an Alumni Professor in 1976 and assuming his duties as dean and director of the Experiment Station in 1980....

BILL G. FELKEY, director of the Office of Instructional Design in the School of Pharmacy, received the 1983 President's Award from the Alabama Society of Hospital Pharmacists. He received the award for his consulting work on an exhibit, brochure, video montage and a professional relations program, which has won national acclaim....

CHARLES M. GRIFFIN '62 is the director of the new office of student services in the School of Engineering. He will continue to administer pre-engineering programs as well as guidance, scheduling, and other services for students in the school. Joining him as associate director is H. N. Conrad, Jr., '76 who will work with engineering upperclassmen and transfer students....

W.L. STRAIN, assistant head of information services with the Alabama Cooperative

NEW ELECTRICAL ENGINEERING BUILDING—The new electrical engineering building, which will officially become Broun Hall later this year when it's dedicated, is open for business and the Departments of Electrical Engineering and Computer Engineering have moved in.

—Photo by Mike Jernigan

PHI KAPPA PHI—Recently Phi Kappa Phi, the highest honor society on the Auburn campus, initiated 110 graduates and then honored three non-students by awarding them membership. Pictured above with President James E. Martin, speaker for the banquet, are honorees W. Kelly Mosley '24 of Atlanta, retired vice president for Southern Bell and frequent benefactor of Auburn where he has established a number of lectureships; Frank Vandegrift, director of cooperative education at Auburn and the winner of a number of national honors in cooperative education; and Neil O. Davis '35, former owner and editor of *The Auburn Bulletin*, chairman of the Humanities Fund Drive, and winner of the award as Distinguished Alumnus in Arts and Sciences.

—AU Photographic Service

OFFICERS—During Spring Quarter the Auburn General Faculty elected new officers for the 1984-85 school year. Pictured are Dr. Ian Hardin '65, associate professor of consumer affairs, chairman-elect; Dr. Margaret Kouidis, associate professor of English, secretary; and Dr. Gerald Johnson, associate professor and head of the Department of Political Science, chairman.

Extension Service since 1976, has been promoted to head. He has been with the Extension Service since 1955 and moved from Tuskegee to Auburn in 1965 as assistant Extension Editor. He holds B. S. and M.S. degrees in education from Tuskegee and the M.S. in agricultural journalism from the University of Wisconsin. He and his wife, Mendy, have four children: Ronnie, a senior at Fresno State, Fresno, Calif.; Darryl, a senior at Tuskegee; Robbin, a teacher in Dothan; and Joyce, a teacher in Winona, Ind....

Three members of the mechanical engineering faculty are winners of the William Spraragen Award of the American Welding Society. BRYAN CHIN '73, JOHN GOODLING,

and NELS MADSEN are sharing the award as authors of the best research paper printed in the supplement to the *Welding Journal*. The paper, "Infrared Thermography for Sensing the Arc Welding Process," appeared in the September 1983 issue and deals with on-going research at Auburn on using head patterns to generate information for guiding welding by robotic equipment. Dr. Chin, Alumni Professor and chairman of the materials engineering program, joined the Auburn faculty in 1981. Development of sensors for robots is one of his primary research interests. Dr. Goodling has been a member of the faculty since 1968 and is involved in research in

Points & Views

Here and There—

Variations on an Old Theme

By Jerry Roden, Jr. '46

Past a certain point, the process of human aging seems fraught with a natural inclination to romanticize the past and to bemoan the future of mankind. The farther we move away from the culture and days of our childhood, youth, and early adulthood, the fairer they become in the golden light of retrospect. And the more we meditate upon the present tensions and conflicts in the world around us and seek to peer ahead into the days to come, the bleaker future human prospects become.

Running counter to this pessimistic streak in the human psyche exists an equally natural tendency to accept human progress as an article of faith. Despite the contradiction implicit in these two tendencies, most of us manage to maintain each in varying degrees without any particular awareness of or concern about the obvious inconsistencies in our beliefs, professions, and actions.

Thus, we can look back upon our earlier years as the end of a golden era in which our immediate ancestors participated, look forward to the future with uncertainty or horror, and yet rest secure in our superiority to our benighted ancestors who lived no farther back than the Dark Ages. And, at the same time, those of us with just enough leaven of optimism can dispel bleak visions of the future with faith that a return to some fundamental principles will lead to a great new era of progress.

My own strong susceptibility to the alternating magnetic force of these divergent tendencies has led me to a deeper and deeper belief in the essentiality of disciplined, balanced education: of an educational program which will provide thorough grounding in both the sciences and the humanities to every high school graduate and offer a continuation of the same in greater depth through the first four years of college.

From such a program, I would not expect miracles: My studies of the long course of human history provide no grounds for optimism about the possibility of human perfectability or the establishment of any secular Utopia. How can we expect such achievement from a race of beings who generally consider peace as their natural mode of existence but who have spent most of their five thousand recorded years in an endless series of bloody wars? These same beings have twice within this century established with marvelous idealism and high hope two great international bodies designed to bring an end to war: The first, the League of Nations, failed utterly to prevent mankind's headlong rush into the devastation of World War II. The second, the United Nations, has done just as little in the prevention of tragic conflict all around the world and, so far, no more to avert the threat of a nuclear holocaust.

On the other hand, my studies of the five thousand years of recorded history have produced no conclusive evidence of total human depravity: On the contrary, under the influence of great philosophers, theologians, poets, and political leaders, the human

ART EXHIBIT—Students pause to look at the works hanging in the annual faculty show of the Department of Art in the Union Gallery. The picture above is "Killer Tomatoes" in mixed media by Bob Caruthers.

—Photo by Jim Killian

race has made some notable advances in developing humane precepts: Generally, the civilized world recognizes, at least in theory, the inalienable rights of every individual and the sanctity of every human soul. And, even though practice as usual lags far behind ideals, humanity has made some significant steps in augmenting justice: Cannibalism, human sacrifice, and chattel slavery have virtually disappeared. And, in the Free World at least, women and ethnic minorities and the aged and children have moved much closer to the equality which they deserve.

These latter developments might provide us some grounds for optimism about the future of mankind if it were not for some other recent historical developments: In the past and present centuries, the world witnessed the growth and maturation in Europe, especially in Russia, of a political philosophy which promises every person absolute equality and fulfills that promise by making the generality of its subjects equal servants of a totalitarian state—not chattel slaves, but bond servants indentured for life to the controlling bureaucracy. And between the proponents of that philosophy and those of genuine democracy resides an enduring enmity which threatens the world with the possibility of a nuclear holocaust.

Despite these latest tragic developments in history, despite all the evidence of human intractability throughout recorded history, and despite my natural bent toward pessimism, I cling to a chastened hope for the future of mankind and maintain my belief that the kind of educational program outlined above just might bring that hope to fruition. Through such a program, we should attain the knowledge, humility, tolerance, and inspiration to continue the struggle for freedom and justice long enough and wisely

enough to overcome the latest totalitarian threat and to prevent the perpetuation or resurrection of older autocratic political philosophies.

Certainly, no one can guarantee such an outcome, but the stake—a world controlled by democratic nations—is high enough to merit the full cost of this hitherto untried approach to educating fully all the citizens of the free world. And there is nothing save apathy or recalcitrance to prevent us from thus committing ourselves to the fulfillment of our noblest ideals and aspirations.

J. Andrew Douglas '17

Those of us who work in the Alumni Association often make friends of people with whom we correspond or talk on the phone and we look forward to meeting them when they come to Auburn. Such a friend for me was J. Andrew Douglas '17, whose letters to *The Alumnews* came regularly and supportively during the years I've been editor. Each time the class of 1917 had a reunion, I looked for his name among those registered. It never was and so I never got to meet him. However, for me and for Jerry Roden, Jr., to whose columns on education Mr. Douglas most often responded, sending clippings, suggested readings, and words of encouragement, Mr. Douglas was very much a friend. His abiding interest in education in general and Auburn in particular was evident. Not only did he send us letters and reading lists, but he sent pictures of his Auburn days for *The Alumnews* to use in our celebration of Auburn's 125th birthday and for Mickey Logue and Jack Simms to use in their pictorial history of Auburn. Education in Alabama lost a friend when Mr. Douglas died on May 5. So did we at *The Alumnews*.

—Kaye Lovvorn

Talking About Sports Fans

By Bob Sanders '52

Sports partisanship is an interesting thing. Let us talk here mainly, for the moment, about followers of college football teams. The season will, after all, be starting any day now. There is a curious phenomenon I have noticed often before: fans outside the immediate town at which the school is located (not counting freshmen) are usually more rabid than the fans in the town.

This fact is demonstrated regularly. Only recently, I was talking to some kinfolks who live in Birmingham. They say that a common, everyday topic on local radio talk shows and among friends and at work is the rivalry between Alabama and Auburn. And that's in the off season.

People can actually get angry. You've heard the type thing: Some dude will call the radio station (that same dude who called the night before and the night before that—it's an inherent weakness of call-in shows that in a city of less than 16,000,000 inhabitants, the call-inners soon settle down to the hard core of exhibitionists, and you start getting the same callers over and over) and say something like, oh, "How you thank Auburn's gon' do this year?"

Well, that, of course, IS strictly a matter of thought. Nobody can predict for sure what any team will do; and if they could, there wouldn't be any point in playing the games.

But the announcer will blather on a bit about what'll happen if the quarterback situation is thus and so, and if the defense lives up to expectations, and if the whole team doesn't come down with herpes, and on and on and on.

Then some Alabama fan will call in and express an opinion: "How come you spend all that time talkin' 'bout them turkeys way down yonder. It makes me sick. Why don't you talk about a real team, Alabama?"

And it'll go on like that.

And rumors. If you want to hear some really juicy rumors about the coaches or players, don't hang around Auburn (for instance—I'm sure the same is true in other college towns), go to the farthest corner of the state, like well, say, Lamar County...and find out things you never dreamt of:

"I heard that one of the assistant coaches down there, Jess Jockstrap, I think his name is, has been ...and that the left tackle, Zeke Fireplugski, got in trouble with this...and the quarterback said he wouldn't play unless...."

"Hmmm," I say. "I haven't heard anything like that, and I LIVE there."

Gossiping and pipelines to really hot inside information or misinformation are much more prevalent away from the eye of the storm, as it were.

Newspaper writers, particularly those in Birmingham and Montgomery, are regular targets. Sports editors, aware of circulations that cover approximately equal numbers of fanatics from both sides, measure the inches devoted to each team with a micrometer to be sure one doesn't get written about more than the other. Yet, you'll hear all the time about how that sorry rag of a paper writes about Alabama (if you're an Auburn fan) or Auburn (if you're an Alabama fan) all the time. Oh, how could they be so disgustingly one-sided about the thing? Another thing to keep in mind is that your really venomous fan is often the guy who didn't go to college anywhere. I know lots of folks, kinfolks, some of them, who never darkened the door of any institute of higher learning, but who would almost kill for the glory of dear old Whatever U. Usually, sad to say, that other institution. I try to be tolerant about it. They just haven't been exposed to the finer things.

BROUN COMING DOWN—Dr. Ed Hobbs, dean of the School of Arts and Sciences, was out early on the Sunday morning that wreckers finished bringing down the last of Broun Hall, and he made this picture some fifteen minutes before the last of the old building was rubble. Broun lives still, however, in the watercolors and in the bricks the LaCrosse Team is selling to raise money for the library and themselves. A \$25 donation to the library gets a Broun brick and a print of the Wally Ridgway '75 watercolor. Send the checks, made payable to the Auburn University Foundation and designated to the library endowment/Broun Fund, to Broun Souvenir, Auburn Alumni Association, Auburn University, AL 36849-3501.

Alumni can be bloodthirsty, too, usually in direct proportion to the distance they are away from their alma mater, hence the popularity of the alumni clubs of all the different places, which are, in most cases, football booster clubs. (Auburn people are, naturally above that sort of thing. They go to those club meetings to find out how many books have been added to the library, and to ask about the pupil/teacher ratio, and to talk about their favorite articles in the latest Phi Kappa Phi newsletter.)

It's amusing that some of the aforementioned kinfolks who are fans of that football team on the other side of the state put on this act:

"Oh, we're for Auburn anytime they're not playing us," they'll simper, piously. One of them appeared absolutely shocked during an Auburn game (at Auburn) at which she was a visitor when the loudest cheer of the whole afternoon was brought about by the announcement that Alabama was getting clobbered by somebody. "I just don't understand it," she said, with a whipped puppy look in her innocent eyes.

Understand it, Toots. To really get down and dirty about it, there is no team on earth or in outer space that the vast majority of Auburn fans wouldn't be for if they were playing Alabama. I don't defend such an attitude. Cerebrally I know it's juvenile and ridiculous.

But...is it a fact of life?

Does John Deere make tractors?

Will Progress Ruin It?—

The Uniqueness of Auburn

By Mike Jernigan '80

Auburn has loved its traditions, whether based upon fact or myth, and these traditions have helped to create the spirit that has been such a powerful influence in creating the Auburn of the 1980's. Auburn is more than a college or a town, it is a way of life.

Allen W. Jones '51
University Archivist

The city of Auburn has always been unique in the state of Alabama. Although other towns in the state host universities or community colleges, no other Alabama town is as inextricably linked to a university as is Auburn. The city is a true college town, with the university being the center of population, employment, and social life. It is this distinction, perhaps more than any other, which makes Auburn unique—an anomaly in the state.

Because it is a college town, Auburn has always been very aware of its past. For such a small place, the "loveliest village" is rich in history and strongly bound by tradition. Samford, Langdon, and Hargis Halls stand like sentinels overlooking College Street and Toomer's Corner, home of fresh-squeezed lemonade and countless spontaneous victory celebrations. Haley Center, that ungainly monument to progress and modern architecture, stands next to dormitory buildings constructed by Franklin Roosevelt's Civilian Conservation Corps during the depths of the Great Depression.

In a town so enamored of its past, change and "progress" are concepts which have ominous connotations. Both the University and the town have resisted change over the years, an attitude which has lent credence to the conception of Auburn as a stronghold of conservative and traditional values. This resistance to change has encompassed changes both physical and spiritual.

Yet change comes to all things, Auburn included. The past year, in fact, has seen more changes on the campus and in the town than perhaps any other comparable time period in Auburn's history. Everywhere it seems that there is construction or remodel-

ing underway. The new Broun Hall was recently completed and a second engineering building will soon be built on the site of the old Broun, a new education complex is going up across from the security office, and Sewell Hall is undergoing a facelift just to mention a few of the projects which are currently underway on campus. As for the city, it seems every day sees the destruction of a long-standing house which is all too often replaced by a rat's maze of sterile, box-like apartments, devoid of both personality and style. Even Auburn's lone concession to suburbia, Village Mall, is undergoing a massive expansion.

Recently, the university and city announced collaboration on the most ambitious project of all—the luring of a proposed \$12 million hotel and conference facility to Auburn. The new facility is to be located across College Street from Draughton Library, where it will displace four fraternity houses which are located on property owned by the University. Negotiations are still in the early stages, but it appears that the six or seven story hotel will be run by a major chain such as Hilton or Sheraton.

All these changes have their positive aspects. Both a university and a city need new and modern facilities and concepts if academic and mercantile business is to prosper, but with these changes comes responsibility also. It is the grave responsibility of both the University and the city to insure that constructive change comes to Auburn without endangering the qualities—tradition, warmth, and unity of purpose—that have made Auburn what it is. Too often, the recent changes which have come to Auburn have been motivated by other, more selfish motives.

There is hope, however, that the growth which is threatening to overwhelm Auburn can be controlled and steered into more constructive channels. Under the present mayor, Jan Dempsey, several steps have been taken in this direction. Two years ago the city sent out a questionnaire soliciting the views of townspeople concerning the city's priorities for growth and improvement over the next twenty years. The plan which resulted from the responses, called the "Auburn 2000 Plan," was perceived by the city as "a method of protecting a community from

ON ITS WAY UP—The George C. Wallace Center for Vocational and Adult Education is now more than forty percent complete. It is under construction on Donahue Ave. across the street from the stadium.

repeating past mistakes, a way for rationally dealing with problems of growth and development... and a blueprint for stewardship over the resources needed by future generations."

The plan established eight subcommittees, made up of representatives from both the community and the University, to study the areas of land use, housing, recreation, transportation and utilities, economic development, education, civic enrichment, and governmental organization. Each subcommittee established goals and objectives for its particular area based on responses to the questionnaire as well as comparison of Auburn to other communities similar in size and makeup.

One of the most obvious needs which emerged from the plan, and that which will probably have the

most direct effect on the relationship between the University and the city, was the question of a new zoning ordinance. Auburn's present ordinance, under which much of the recent haphazard growth has taken place, was written in 1968 and last revised in 1972. City officials have been working for more than a year to formulate and put in place a new, up-to-date law which can help to correct or prohibit problems which have resulted due to loopholes or inadequacies in the old. The new ordinance should be in place by the coming fall.

Although the new law will not solve all the problems caused by the proliferation of unsightly and poorly planned housing, it will impose stricter regulations concerning landscaping, buffering from adjacent homes, and provisions for parking and traffic access. Of even more interest to the University is the "University Services Area," which is basically an attempt to encourage the students to move out of the suburbs where they have migrated in the past few years and back into the residential areas bordering the campus.

City planners feel such a move would have a number of positive effects. Attractive landscaping including bike paths and pedestrian concourses such as those on campus could be extended out into the student residential areas immediately adjacent. The resulting blend of University and city would not only be aesthetically pleasing, but would also solve lingering traffic and parking problems as well. Though such ideas are at present but a gleam in Mayor Dempsey's eyes, there is hope that major steps toward this goal can begin once the new zoning ordinance becomes law. Completion of such a plan, however, it still years in the future.

In the meantime, Auburn must begin to reconcile itself to change, for there is no escape from the relentless rush of progress. The most important thing is to insure that this progress is compatible with all the intangibles that have made the Auburn experience a cherished part of so many people's lives. As Mayor Dempsey expresses it—"The Auburn mystique is as much due to its people as to its buildings. If the kind of people who have made Auburn what it is are to continue to be attracted here, then the city must improve and meet new challenges while at the same time protecting its past."

Finding Drugs for Cancer Often Long Tedious Process

By Sam Hendrix

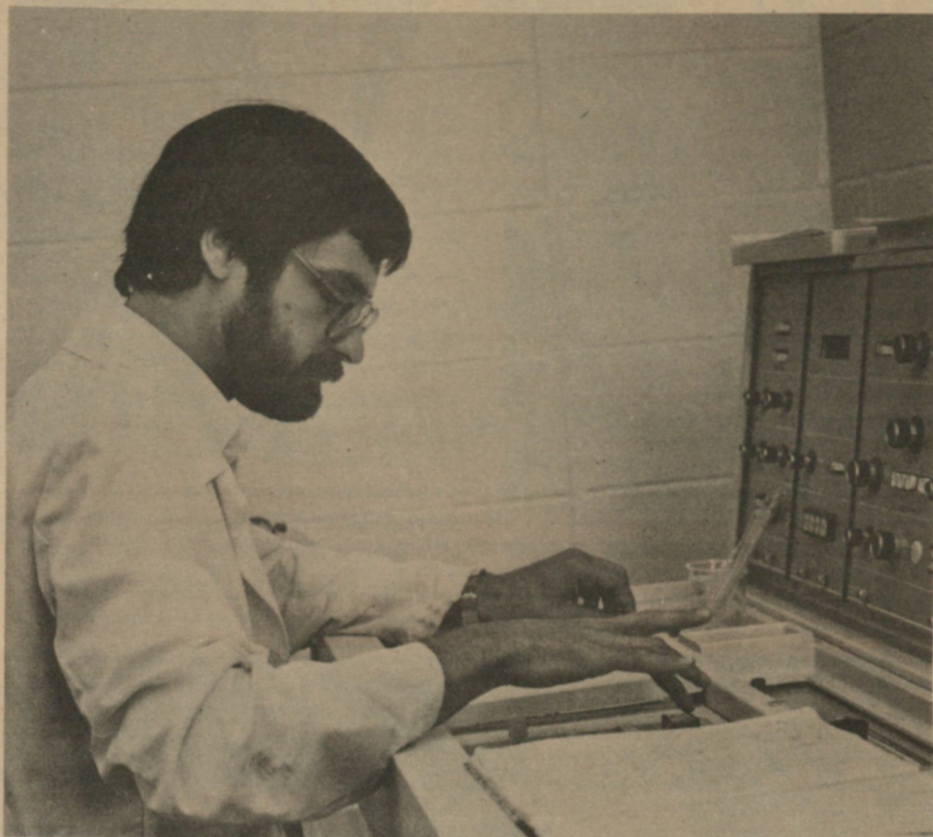

"Eventually, cancer will account for far fewer deaths than it does today," writes Steven B. Oppenheimer in his book *Cancer: A Biological and Clinical Introduction*. Such optimism has gradually increased within the medical community because of advancements in research over the past few years. Still, with only a dozen or so of the more than 100 types of cancer regarded as curable, much research into all aspects of these neoplastic diseases must take place before man has a grip on the most dreaded disease family.

Some of the major research projects conducted by faculty members in the division of medicinal chemistry in Auburn's School of Pharmacy deal with the development of new anti-cancer drugs. These professors, along with their students, are attempting to design and synthesize new derivatives of drugs which have proven effective in test situations such as in small laboratory animals or in cultures of tumor cell growth, but which have not stopped cancerous cells within the human body.

Dr. Jack DeRuiter, assistant professor of pharmacy, is a medicinal chemist who, along with his wife, Jacquelyn, and children Casaundra, 3½, and Alex, 1, came to Auburn a year ago. He began working on anti-viral and anti-cancer drugs while studying for his master's degree at the University of Michigan, then continued that work while earning his Ph.D. from the Medical College of Virginia at Virginia Commonwealth University in 1982. He then spent two years working with Dr. Wayne Anderson at the State University of New York at Buffalo, where Dr. Anderson directs one of the largest and most successful anti-cancer drug development programs in the country.

Dr. DeRuiter describes his research at Auburn as "simply developing new, better anti-cancer drugs. We take some existing experimental drug and in some way modify or alter its chemical structure to convert it to an agent which would be useful in treating human neoplastic disease, or cancers," he said. "Essentially the drugs we're working on are new chemical entities for the treatment of cancers not managed effectively with the drugs presently available."

An example of this research is Dr. DeRuiter's project dealing with the experimental anti-cancer drugs azaserine and DON. Both of these are effective in fighting animal cancers and human cancers which have been transplanted into test animals. They have not, however, proven effective against human cancers in clinical trials because they are digested in the stomach or the human bloodstream prior to reaching populations of cancer cells. Dr. DeRuiter and his student assistants are attempting to modify the chemical structures of these drugs in hopes of obtaining new agents which may be resistant to degradation and, therefore, more effective.

DRUG DEVELOPMENT—Dr. Jack DeRuiter, assistant professor of pharmacal sciences in Auburn's School of Pharmacy, attempts to create derivatives of existing drugs which will more effectively control diseases in the human body.

—Photo by Ruth Schowalter

This work entails more than mixing up chemicals in a beaker. With all the tests and steps involved, a single project can take anywhere from two or three months to several years. Dr. DeRuiter estimates the actual chemical synthesis of the new potential drugs takes up ninety percent of the time and effort of the total project.

"What we do depends on what each project calls for," Dr. DeRuiter said. "We generally attempt to design drugs which will prevent the synthesis of DNA in cancer cells. We look at how cells are believed to make DNA, a complex, multi-step process, and try to find some point in that pathway that we can interrupt. Unfortunately, most of the drugs available today not only stop growth of cancer cells but inevitably stop the growth of normal cells, too. The effect of these drugs on normal cells produces many of the side effects commonly observed with cancer chemotherapy, such as nausea and vomiting, blood disease, and increased susceptibility to infection. Our goal is to make drugs more specific for cancer cells."

One way of doing this, Dr. DeRuiter said, is to work on the cells' utilization of glutamine, a crystalline amino acid that all cells need to produce DNA. Normal cells are capable of producing all the glutamine they need, but a number of cancer cells don't have enough glutamine to make DNA. These cells must obtain glutamine from outside sources. These cells, then, are inordinately sensitive to anything affecting their use of glutamine. As Dr. DeRuiter puts it, "The derivatives of azaserine and DON we're making are 'glutamine antagonists,' blocking normal physiological roles of glutamine. Our new compounds prevent glutamine from being used for DNA production, thus stopping the process." As normal cells are not nearly as affected as

cancer cells when the glutamine utilization is decreased, theoretically an effective drug would extinguish cancer cells but not normal cells.

As for success, "We've made a couple of compounds and sent them to the National Cancer Institute," Dr. DeRuiter said, adding that he has not heard from that organization yet because of the amount of testing it performs.

So the testing goes on, at Auburn and at many sites in the world. That's the only way Dr. Oppenheimer's prophecy will come about. In the meantime, Dr. DeRuiter said, the public remains uninformed as to what cancer is.

"Many people generally have a misconception in that they feel we should spend our time searching for the cause of cancer rather than the cure," Dr. DeRuiter said. "But simply finding the cause would not necessarily benefit anybody as that doesn't solve the problem." It doesn't mean that we will automatically find a cure for cancer as part of the process. He pointed out that our environment seems filled with carcinogens, probably because research has determined what possibly causes cancer. "Exposure to these things over a long period of time means there's a chance of developing cancer," Dr. DeRuiter explained.

Dr. DeRuiter also pointed out that cancer is not a single disease but is a family of diseases, neoplastic or "new growth" diseases. "Cancer basically amounts to cells growing out of control," he said. "All cells are constantly growing, some more rapidly than others. But cancerous cells grow autonomously without any apparent controlling factor and at accelerated rate."

He added that with so many different forms of the disease and with detection of

cancer usually not before the disease is already established, it will remain difficult to treat. Also the fact that most cancer cells arise from normal mammalian cells makes it difficult to design drugs which will kill cancer cells but not normal, healthy cell populations.

Cancer Research At Vet School

By Sam Hendrix

The study of cancer in animals does not have the impact of similar studies in man, but it is vital if neoplastic diseases are ever to be understood. Cancer is infrequent in large animals such as horses, cattle and pigs, but smaller pet animals, which share the same environment and often the same diet as their owners, develop cancer more often. Several departments within Auburn's School of Veterinary Medicine study and attempt to treat animal cancers.

"We get about 500 animals with cancer per year in the Small Animal Clinic," said Dr. Ralph Henderson, associate professor of small animal surgery. "These almost totally correspond with the cancers in man. Cancer in dogs is especially similar to that in man, so dogs are good models for treatment." Dr. Henderson pointed out that although the majority of cancers that occur in animals also occur in man, there is no known transmission of cancer from animals to man. However, because the tumors in afflicted animals are so similar to those formed in humans, treatment of animals often leads to knowledge concerning treatment of tumors in man.

Dr. Henderson explained that after initial diagnosis, veterinarians determine the best treatment or proper therapy for the case. "If the cancer is localized and not spread, then it's best treated in surgery, by radiation, or by freezing it," he said. In surgery, the tumor is simply cut away from the body. Radiation treatment consists of a series of exposures to radioactive particles which are beamed into the tumor to destroy the tumor's reproductive capability. To freeze a tumor, the veterinarian applies liquid nitrogen to the tumor, killing the tumor. This process is known as cryosurgery.

"If the cancer has spread to other parts of the body (either through the bloodstream or through the lymphatic system), then chemotherapy or some other type of treatment is necessary," Dr. Henderson said. Chemotherapy consists of distributing certain chemicals throughout the body to fight cells which have broken away from the original tumor and lodged elsewhere. The chemicals are administered either through capsules for oral intake or through injection directly into the bloodstream. Dr. Henderson added that chemotherapy is not used extensively in animal care because if an animal cannot be assured quality survival, then veterinarians usually feel it's best not to allow the animal to live and suffer. This differs from human treatment where life usually is prolonged as long as possible.

Dr. William Brawner, assistant professor of radiology, works with radioactive diagnosis and treatment of animal cancer. Basically when an animal is suspected of having a tumor, the veterinarian injects an appropriate isotope, a radioactive particle, into the animal's bloodstream. The isotope travels to the critical area where it lodges, then the radiologist uses a gamma camera to scan the anatomy. This scan reveals whether the animal has cancer, what type of cancer, and tumor size.

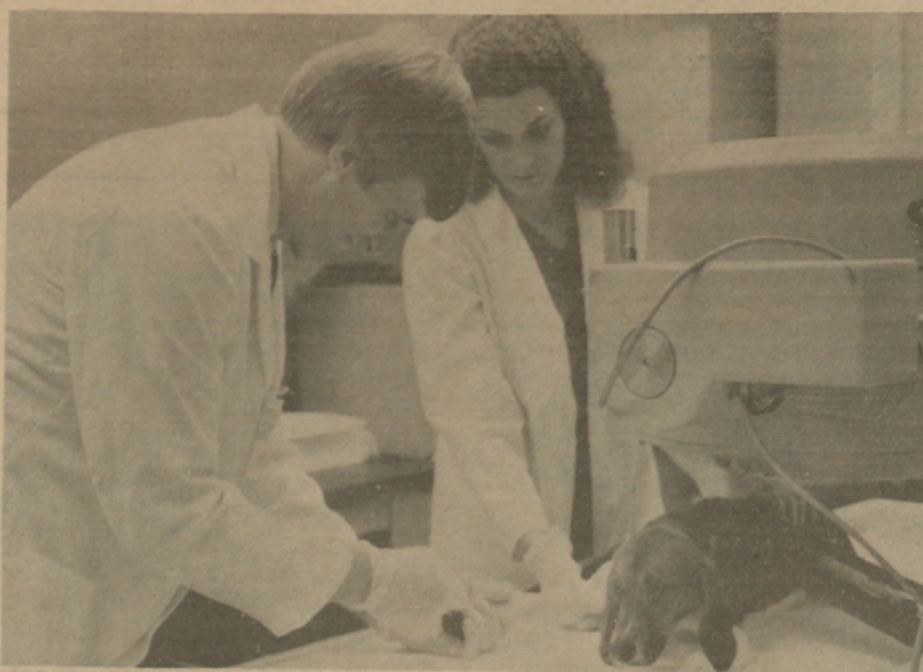

"The scan machine was actually developed for humans," Dr. Brawner said. "Scans differ from x-rays, and through the gamma camera we form or develop nuclear images from the isotopes that have gathered in various organs." The gamma camera differs from standard x-ray equipment in that it detects the radioactive particles from the body rather than beaming through the body to produce a negative image. Specific body parts attract and hold different isotopes, so knowing where a tumor is suspected dictates which isotope a veterinarian would choose for a particular case.

Dr. Brawner added that radiation treatment is the best way to treat some types of cancer which cannot be surgically removed because the tumor is too near vital structures. He also noted that Auburn's School of Veterinary Medicine is one of the few Southeastern schools with this particular phase of treatment. "Our school is the only place in Alabama, Georgia, Florida, and Mississippi doing routine radiation therapy," he said. "We serve as a referral center for this region." The treatment is not performed at the Vet School, but at the teletherapy unit in the Nuclear Science Center on the main campus.

After surgeons in the Small Animal Clinic have removed tumor tissue, they send the extracted matter to the pathology department, chaired by Dr. Lauren Wolfe. Pathologists grow the cells under laboratory conditions. "We look for such things as growth properties, chromosomal cytogenetics [study of hereditary aspects of the chromosomes within the cells], structural components, the ability of single cells to form colonies in a semi-solid medium [a jello-like environment], cells' ability to grow in certain environments, cell surface markers [trademarks of individual types of cells], and a few other things," Dr. Wolfe said. These studies, he said, are all basic studies in cell biology.

Dr. Wolfe explained his department's work with cancerous cells is basically an observation of cell growth. "We attempt to evaluate the cell systems to predict behavior of malignant cells or the sensitivity of these cells to different therapeutic agents and radiation," he said. "We want to learn something about the behavior of tumor cells that will assist in the clinical management of the tumor. We hope to tell the clinician the likelihood of whether a tumor will recur."

Pathologists do this by breaking down tumor tissue into single cell suspensions, or groups of around a thousand or so cells. They then apply acids in order to measure the growth of the cells. After the cells grow for several generations, they are injected into laboratory mice. The resulting tumor is inevitably similar to the original tumor in the dog or whatever animal was affected. By watching the new tumor develop, the pathologists can understand how it develops, which they hope will lead to methods of stopping the cancer.

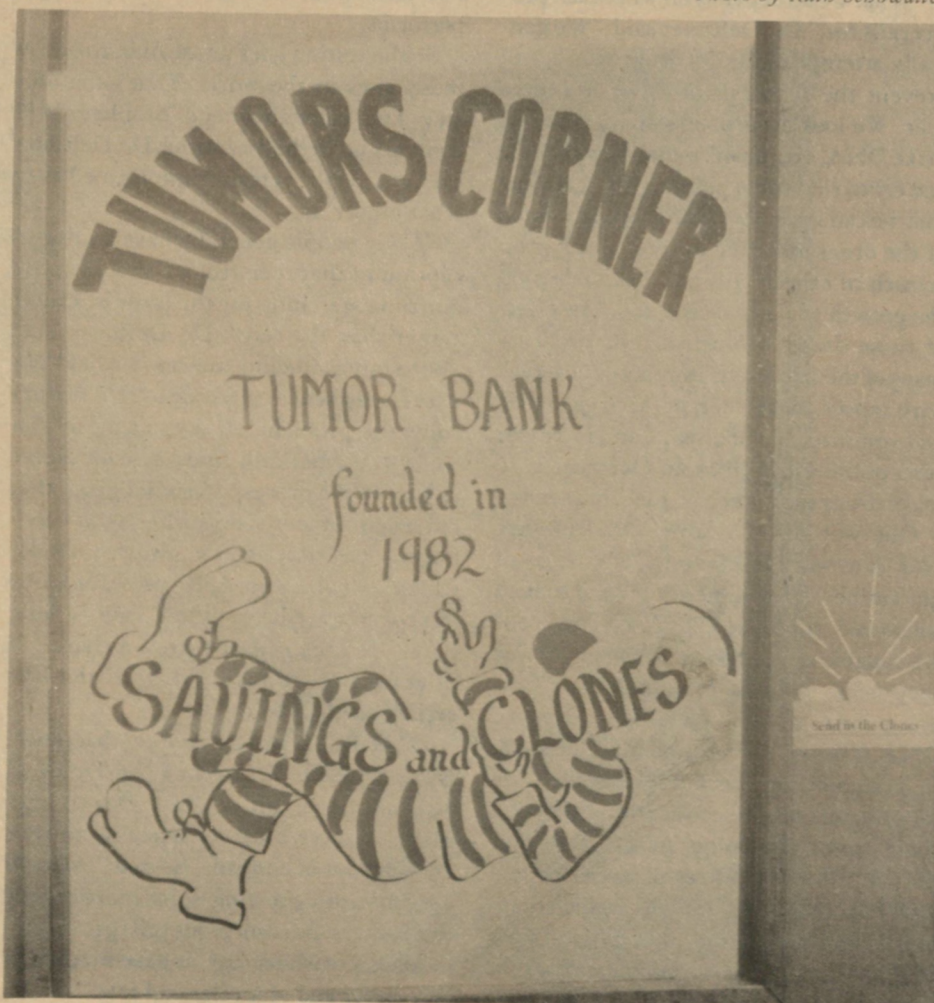

NOBODY LIKES SHOTS—Dr. William Brawner, assistant professor of radiology in Auburn's School of Veterinary Medicine, assisted by nuclear technician Janet Foreman, injects isotopes into a research animal who has seen better days. The research in radiology includes scanning of the animal by the gamma camera (above the dog). This machine detects where the injected radioactive particles have lodged in the animal's body, revealing whether the animal has a cancerous growth at that point.

Jordan Family Aids Museum

By Steve Granade
Ag Research Information

During his lifetime, Coach Ralph (Shug) Jordan made varied and numerous contributions to Auburn University and the Auburn community. Even today, one contribution helps carry on the coach's philanthropic tradition—not on the football field, but in the scientific realm. The Jordan family is supporting, through a special endowment, the Auburn University Museum of Vertebrate Zoology. Maintained in the Department of Zoology-Entomology, the museum displays the only comprehensive collection of Alabama vertebrate animals, with the exception of fishes, in existence. (Auburn's Department of Fisheries and Allied Aquacultures houses an excellent ichthyological collection.)

Through donations to the Jordan Memorial Fund and the Jamie Jenkins Memorial Fund, as well as ancillary monies through the Alabama Agricultural Experiment Station, the museum houses more than 29,000 preserved and cataloged specimens. In addition to the preserved specimens, about 30 living reptiles are maintained for use in teaching and research.

"It is vital that Auburn University, with its important teaching and research programs in vertebrate natural history and wildlife conservation, maintain a museum of a caliber that stimulates a sincere interest in learning. I'm so glad we can be a part of such a worthwhile endeavor," said Evelyn Jordan '66, wife of the late coach.

Conservative estimates of replacement costs of the reptiles and amphibians in the museum total to an "astounding" \$1,491,500, according to Dr. R. H. Mount '54, professor of zoology-entomology, who, along with Dr. J. L. Dusi, maintains the collections. The replacement figure includes items such as expenses associated with collecting, preserving, and cataloging the specimens, and cost of preserving fluids, containers, and shelving.

The museum is used by a variety of scientists and graduate students pursuing zoological research. Twenty-three scientists have received advanced degrees in herpetology from Auburn since the origin of the museum, and comparable numbers have been trained at the graduate level in ornithology and mammalogy. Among the herpetologists is the Jordans' son, Ralph, Jr., '70, who currently directs T.V.A.'s Regional Natural Heritage Project.

Dr. Mount says he's confident that within the past two to three decades, Auburn University has produced more vertebrate natural historians at the M.S. and Ph.D. levels than all of the other state universities combined. A majority of these graduates depended in varying degrees on the museum for conducting their research and documenting the results.

More than 100 publications have resulted directly from museum-related research, and a great many more have been written by scientists at other universities who make use of the collections. In addition, the museum benefits the instructional program of the School of Agriculture, Forestry, and Biological Sciences by providing preserved and living examples of various species for upper-level courses in vertebrate zoology.

The museum also serves to educate the

general public. Tours for groups and individuals from various parts of Alabama are arranged and conducted by departmental personnel and student volunteers.

Maintaining such a unit requires many volunteer hours and auxiliary funding—usually through grants and donations—to carry out the museum functions, says Dr. Mount.

"Right now, our museum is operating on a shoe-string basis, and we badly need more space and a full-time curatorial staff. If we can find some more friends like the Jordan and Jenkins families, we might be able to develop a first-class facility like the ones in most other states and thus qualify for some federal grant money," he explained. "Inasmuch as many industries benefit indirectly from museum-related functions, it would be in their best interest to help out too."

Dr. John F. Pritchett '65, head of the Department of Zoology-Entomology, agrees with Dr. Mount and concludes, "The Jordan Memorial Fund offers a sterling opportunity for friends of Auburn to lend their support to the University and at the same time to honor the memory of Coach Jordan, a man who devoted his life to Auburn and its students."

One of First AU Coeds Honored by Son, Great-Granddaughter

By Kelly Glover
AU News Bureau

The year was 1894, and on a warm June day Willie Gertrude Little, Katherine C. Broun, and Margaret Kate Teague stepped forward "amid thunderous applause" to receive their diplomas. As the first three women to graduate from Auburn, they

would always be remembered for the "aura of gaiety" and "scholarly mark of excellence" they brought to the Agricultural and Mechanical College of Alabama—now Auburn.

Though they may have returned to Auburn numerous times, their presence some 46 years after graduation marked another special occasion. On a warm sunny May day, the three women, hair distinguishedly gray with age, were on hand for the dedication of the quadrangle dorms. The dorms were built in the late Thirties to house women students, and three of the dorms today bear the names of Auburn's first three women graduates.

Miss Little's son, Judge Leigh Clark '21 of Birmingham, has just given a picture of his mother, for whom dorm three was named, to Auburn. "It's a picture of Willie Gertrude Little as she was when she graduated," said Mr. Clark. His mother died in 1949.

"We always considered Auburn as home and still do," said Judge Clark, an Auburn alumnus himself. He explained that his mother grew up in Auburn and while a student at the college, studied general courses and was especially scholarly in languages—English, Greek, and Latin.

After graduation, Miss Little taught at Auburn High School for two years. In 1896, she married George Samuel Clark, their marriage marking the first of an Auburn alumna to an Auburn alumnus. (He earned a degree in chemical engineering.)

It is only by coincidence that Miss Little's great granddaughter, Kate Marshall, a junior in international trade, now lives in Little Hall. When asked why she had come to Auburn, Kate said that her parents had liked the Auburn campus and the educational opportunities Auburn offered. But, she added, family tradition might have swayed her decision to come to Auburn. "I

ENDOWMENT FOR MUSEUM—Auburn officials and faculty met with members of the family of the late Coach Ralph (Shug) Jordan recently to receive an endowment in support of the Auburn University Museum of Vertebrate Zoology. Maintained in the Department of Zoology-Entomology, the museum contains the only comprehensive collection of Alabama vertebrate animals, with the exception of fishes, in existence. Seen from left are Dr. Stanley P. Wilson '54, vice president for Agriculture, Home Economics, and Veterinary Medicine, Eve Schlesinger Jordan '71, Ralph Jordan, Jr., '70, Evelyn Jordan '66, Dr. J. F. Pritchett '65, head of the Department of Zoology-Entomology, Dr. R. H. Mount '54, professor of Zoology-Entomology, Dr. Gale A. Buchanan, dean and director of Alabama Agricultural Experiment Station, and Dr. R. A. Voitle, dean of School of Agriculture, Forestry, and Biological Sciences.

came to Auburn because I like the campus—a lot of Grandfather's family has always been close to Auburn," she said.

Along with Kate, another of Miss Little's great-grandchildren recently attended Auburn. Ken Clark '82 an electrical engineering major from Homewood, graduated again in June after receiving a degree in mechanical engineering in December 1982.

W. H. Holley Heads Management Dept.

Dr. William H. Holley has been appointed head of the Department of Management in the School of Business. Dr. Holley, who joined the Auburn faculty in 1969, became an Alumni Professor in 1980 and a Lowder Professor earlier this year.

In announcing Dr. Holley's appointment, Dean of Business George R. Horton commented on his wide background: "He's an excellent teacher, a successful textbook author, an accomplished researcher, a recognized leader within professional associations, and a consultant to industry. He will provide leadership for a rigorous and productive environment within the department and contribute significantly to a strong interface with the business community."

Dr. Holley holds the B.S. and M.S. from Mississippi State and the Ph.D. from the University of Alabama. He is an accredited Personnel Diplomate of the American Society of Personnel Administration; a Danforth Associate Fellow; a Fellow of the American Council on Education; a national seminar leader for Beta Gamma Sigma, business honorary; and in 1977-78 was one of 16 selected for an American Assembly

for Collegiate Schools of Business Sears Federal Fellowship, assigned to NASA in Washington, D.C.

He is on the arbitration rosters of the American Arbitration Association, the Federal Mediation and Conciliation Service, and the National Mediation Board. He has published more than 50 journal articles and is co-author of two books, *The Labor Relations Process* and *Personnel Management*, the former used at 343 colleges and universities and the latter, published in 1983, at 57. He is currently working on a third book.

Dr. Holley's wife, Betty, is a specialist with the Expanded Food and Nutrition Program with the Alabama Cooperative Extension Service.

News of Former Faculty

The late KATHARINE COOPER CATER, dean of women, dean of student life, and social director at Auburn for 34 years, has been nominated to the Alabama Women's Hall of Fame. In addition to her contributions to Auburn, Miss Cater was recognized for her contributions to professional and civic organizations on state and national levels.

Late Prof. J.R. RUTLAND '00, former librarian and English department head at Auburn, was recently installed in the Alabama Library Association's Library Roll of Honor. Prof. Rutland was librarian from 1905 to 1915 and directed the first summer school at Auburn in 1913. In the Twenties he became head of the English Department and among his activities over the years were editing *The Auburn Alumnus* and founding the Auburn Little Theatre.

FIRST COED—Judge Leigh Clark '21 and his granddaughter Kate Marshall, an Auburn student, hang a portrait of Judge Clark's mother, Willie Gertrude Little, one of the Auburn's first three coeds, in the dorm named for her.

High Schoolers Join Theatre Majors for A Busy AU Summer

By Ruth Schowalter

While many Auburn students groan about the slow paced summer quarter and hunt vigorously for activities to fill their empty hours, some students fail to get even the first blush of a summer tan. The theatre major's summer is a collage of saws, hammers, humming sewing machines, grease paint, bright lights, auditions, and acting—everyone doing everything, or almost everything. Auburn University's Theatre Department, beginning in 1979, decided to give its majors an opportunity to work like a professional company during the summer months. It prepared a quarter jammed with three performances, one musical and two light comedies, that would be mounted and rotated throughout the summer season. This arrangement demanded that the theatre major learn more than one role at a time, and required that he also help with the technical aspects of shifting sets, costumes, and make-up from show to show. And most important of all, the summer program threw him into close quarters, day-in-and-day-out, with his fellow actors—an important learning experience for those who plan to make theatre their bread and butter money. "Everybody knows everything about everybody; they become your family," says theatre major Brad Mooy. "If you hold grudges you can forget theatre."

Last year the Theatre Department decided to include talented high school students from around the Southeast in the summer experience. Adding high schoolers both improves musical performance at the secondary level and encourages some of that high school talent to come to Auburn. In one year's time the number of high school students increased from twenty-five to forty-two, with some students coming from as far away as Vermont and Kansas. And, instead of three shows that play throughout the summer, each plays only for a week and has a different format—a musical, a dinner theatre, and one traditional show.

The first production, the musical, is devoted entirely to the high school performers, with the theatre majors assuming various instructive roles of director, choreographer, or teacher, assisting the younger dramatists. The musical is prepared at a breakneck speed, challenging the high school students to audition, memorize lines and dance numbers, build sets, design costumes, and learn make-up in a mere three weeks. But, apparently, this intense schedule presents no problem to the teenagers. "They have boundless energy," explains theatre professor Marilyn Powel. Unlike the college students who are somewhat jaded, she says affectionately, the high school students had practically memorized all of their lines the day after auditions.

The average day of the Auburn University Theatre Company begins something like this: It's Friday, and the high school students have two more weeks to go before opening night. Company call at nine assembles everyone in the auditorium for general announcements and rehearsal schedules. Voices, some eloquently audible,

MAKEUP CLASS—Two Auburn students are reflected in mirrors of Telfair Peet Theatre as they prepare theatrical makeup. During the summer the Auburn students perform as a repertory company, learning technical aspects of theatre production as well as acting.

—Photo by Ruth Schowalter

some in whispers, others murmurs, rise and fall—"Have you memorized your lines?" "I've got one scene I only have to moan in." "They're blocking the dialogue today."

The high school students, strewn in the front five rows, and the college students casually seated behind them watch as Professor Lois Garren, the director of *Guys and Dolls*, wafts on stage in a blue jeans skirt and cotton blouse. After she has made her announcements, a piano begins to trill on the main stage, and everyone magically disappears down hallways and behind brown velvet curtains.

Saws from the scene shop begin to whirl. "Rehearsals are everywhere: there's dance in the acting studio upstairs, leads on the main stage, chorus in the band hall in the music building, and individual scenes are starting up in the directing studio," describes Brad, seated in a comfortable chair in the deep recesses of the Green Room, an actor's haven, or in layman's terms, a lounge. "Every place is taken up at all times," adds Bevelyn Lummis, a senior theatre major. "Everyone does technical work in addition to performance," she says. "We know how to do it all—lights, box office, costumes, and make-up." She choreographed the dance numbers for *Guys and Dolls*.

"There is no such thing as free time," says Brad. Even though he enrolled for only six hours of theatre workshop, he is at the theatre all day except when he is attending his American government and feature writing classes. As he assists the high school students, he has already started rehearsals for *The Good Doctor*, the last play of the season. "They are really a company unto themselves," comments Bevelyn about the high school students. "They learn how a company runs, and we learn more by teaching them."

And what is so special about working for the company? "It's a challenge," says Seth Cherniak, a high school senior from Mobile, cast in the role of Nathan Detroit. "It's the biggest role I've ever had. I have a lot of lines and characterization to learn," he says a little nervously, but adds, "It's a challenge for the whole cast—we are eating, sleeping, and drinking theatre." Indeed, the students are saturated with theatre. Except for a half hour for lunch and two hours for

dinner, their responsibilities are to theatre.

Playing opposite Seth is Auburn high school senior Joelle James, back for her second summer and cast in the role of Adelaide. They play a couple who have been engaged for fourteen years, much to the dismay of Adelaide who is determined to get Nathan Detroit to the altar. "It's not just an extracurricular activity," says Joelle of the three week musical camp. "The Theatre Department is serious about what it's doing." Describing her role in last year's production of *Oklahoma*, directed by Ralph Miller, she says, "I was Ado Annie, the girl who can't say no." Having worked with two different directors, she discovered that each director's method differs, but "both work."

Back on main stage a tall, blond high school girl clad in shorts and a t-shirt, peers from behind the stage curtains at Professor Garren and the five Auburn male students huddled about her. "Is there a free college student?" she asks. They all look up. "I need to take some posters to Opelika." One student volunteers. Professor Garren dismisses the group and moves toward center stage to begin blocking the leads' dialogue. Her stage manager, Alice Sullivan, a junior in design and tech, sits in the front aisle taking notes. Someone overhead rattles lights, getting them ready for the show.

HIGH SCHOOLERS—This quartet of high school students are among those talented youngsters on the Auburn campus for a taste of Auburn theatre. Coming from as far away as Vermont and Kansas, high school students interested in studying theatre get both an introduction to Auburn and to the career they think they're interested in.

—Photo by Ruth Schowalter

Meanwhile, Bill Rich '83, the technical director for the summer theatre, commands an ever varying number of students with a variety of skills back in the scene shop. For *Guys and Dolls*, five sets had to be assembled in a two to three week period. "I like it very, very much," says Bill, undaunted by the hectic schedule after doing the tech work for thirteen shows in the past ten months for the Springer Opera House in Columbus, Georgia, where his workers consist of community volunteers. "They are enjoying it," he says referring to the entire chorus of twenty kids. "They are talented people and are willing to learn." And as he works on the first show his thoughts are already on the set for the second show, *Bedroom Farce*. That particular set will be built in the scene shop so it can be disassembled and taken to the Auburn Conference Center. Last year a minor miscalculation for the set of *Play It Again Sam* caused the set builders to shave an inch off the entire set—the calculations hadn't taken one inch of carpet into consideration.

While hammering and sawing go on downstairs, upstairs in one of the theatre's offices Professor Powel prepares a lecture for a drama class that afternoon. Hand-made masks left from a class rest on her filing cabinet and silhouettes of two flamings frame her window. In the evening she will have the first reading of *The Good Doctor*, which she will direct.

As the saying goes, there is no business like show business, and the business of the moment is *Guys and Dolls*. After all the singing and dancing is over—what then? "When they're worn out and going home," says Brad of the high school students, "we're starting the next show. There's no break for us."

New Management M. S. Has 1st Graduate

By Anita Stiefel '85

One of the School of Business's newest programs, the M.S. in management with a concentration on management information systems, had its first graduate in June. Virginia M. Davis '82 completed require-

ments for the new degree and is now production planner for Ampex Corp. in Auburn.

Management information systems (MIS) is one of three areas of concentration a student seeking an M.S. in management may choose. The program was created two years ago by the Department of Management, and is directed by Dr. Charles A. Snyder.

The MIS program is designed to teach the management of computerized systems which aid in business decision-making. "The focus of our program is on the area where training is needed most—applying knowledge," explains Dr. Bill Ledbetter, a colleague of Dr. Snyder. "Computer science finds the technology. We train people to employ this technology embodied in the computer to improve productivity in organizations," Dr. Snyder adds.

There is a strong demand for the program, and it will benefit the state "by providing education to people who can employ computers and telecommunications and improve productivity, even raise the standard of living," Dr. Snyder says.

In addition to completing 45 quarter hours of classwork and writing a thesis, MIS students are actively engaged in research while in the program. In the past two years, faculty and students published and presented various papers at the state, regional, and national levels. The Southeast meeting of the American Institute for Decision Science chose a paper by MIS student Libby Adams and Asst. Prof. Nelson Ford, Jr., as the number one presentation. Dr. Snyder says he feels this achievement is evidence of the program's success. "We're young, but we think we have a quality program."

The Management Department offers 16 MIS courses. All 3,000 undergraduates in Business curricula are required to take two of these courses.

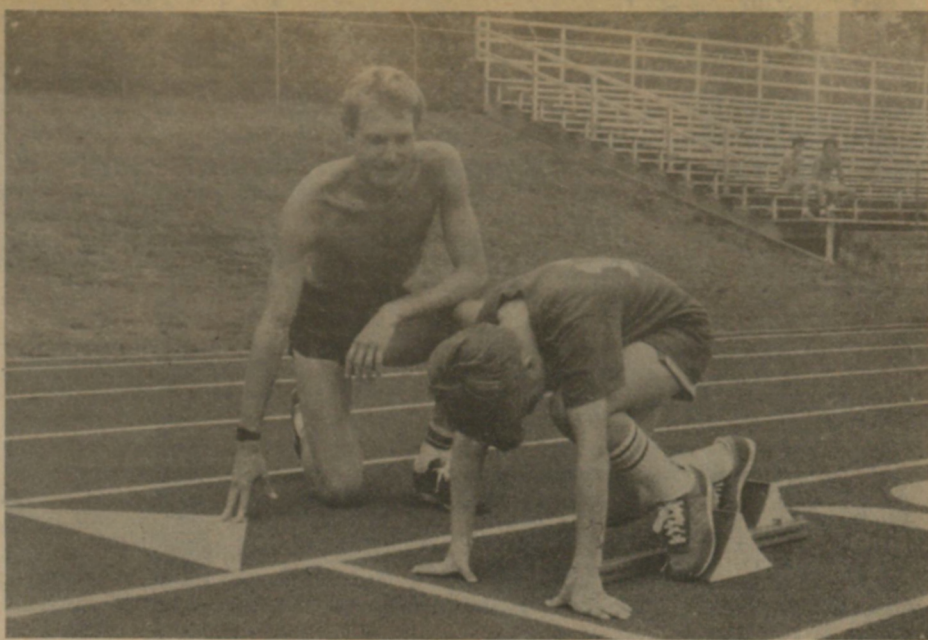

All of the MIS faculty—adjunct part-

time faculty in addition to seven full-time instructors—hold doctoral degrees except one, who will complete his dissertation this summer. All have extensive and diverse consulting and management experience, and average about ten years each of professional non-academic work experience. Several have held significant management and MIS positions in both private industry and public organizations.

The MIS branch of the master's degree program constitutes 80 percent of the graduate students enrolled in the Management Department. Twenty-five are enrolled in MIS for fall, coming from as far away as Calgary, Canada, and Taiwan, and from schools like the University of Pittsburgh and Virginia Tech. Dr. Ledbetter feels proof of the quality of Auburn's MIS program can be seen in the jobs that graduates are offered. For instance, Libby Adams will be the second graduate when she completes her thesis in the next few months. She has already accepted a position as data processing manager (MIS director) for Lubbock General Hospital in Lubbock, Tex. "Some are lured away before they finish," explains Dr. Ledbetter.

The program is "only constrained by resources," according to Dr. Snyder. He says although the current faculty provide a solid base, additional MIS instructors are needed to meet the demand for teaching, research, extension, and consulting. The program also needs assistance in facilities. "We are dependent on corporate donations," he says.

Auburn is applying for a \$12,000 planning grant in hopes of improving the MIS program. IBM Corporation is providing grant money to schools offering a master's in MIS in an effort to upgrade and improve the programs. A total of \$25 million will be distributed among 30 colleges, some of which will receive a maximum of \$2 million each. Management professors are optimistic about Auburn's chances of receiving

TUTTLE TIPS—John Tuttle gives youngsters in AORTA, the local runners club, advice on how to attain Olympic form in the marathon. Tuttle, who graduated from Auburn in 1982 after running short distance events for Coach Mel Rosen's track team, has now switched to long distance running and will be a member of the U.S. Marathon Team in the upcoming Olympics.

aid because of the qualifications of our program.

A Ph.D. program in MIS is under development and will be implemented in the next two years. Plans exist for the creation of a bachelor's degree program specifically in MIS, in addition to the present one which is broader and based on management in general. Other plans include developing a Research Center and a Research Lab to more fully explore the management of evolving technologies in areas such as telecommunications, expert systems, and office automation.

Tuttle Newcomer To Marathon But Makes Olympics

By Mike Jernigan '80

Despite all the controversy surrounding this year's Olympics, at least one Auburn athlete is looking forward to a trip to Los Angeles this summer. John Tuttle, a former Auburn track star and 1982 graduate, still trains in Auburn and recently he became the first Tiger athlete to officially qualify for the U.S. team. Although Tuttle was a middle distance runner while a Tiger, he has taken up running the marathon since he graduated. Still a relative newcomer to the grueling 26 mile, 385 yard race, he has quickly become one of the top marathon runners in the country.

Tuttle ran his first marathon at the Florida Festival in 1983 against an international field and won first place despite his inexperience. He then went on to finish second in his next meet in Duluth, Minn., before placing fourth in the prestigious New York Marathon. In each race he improved his time.

His performance was good enough to land him in a field of 170 other qualifiers at the recent Olympic trials. Only three runners actually make the team, and Tuttle made the grade by finishing third in the trials behind Peter Fitzinger and Alberto Salazar. These three will represent the U.S. when the track and field events begin on August 12.

It usually takes up to a month to recover from the physical drain of one marathon

and begin preparations for the next. Tuttle prepares by running two short workouts a day and at least one run of twelve miles or longer a week. He will continue this routine until July 20, when he departs for Los Angeles to begin final workouts with the rest of the team.

According to Tuttle, the trick to running a long race such as the marathon is to be relaxed. The most common downfall of the marathon runner is what is known to the athletes as "the wall" — physical exhaustion which usually occurs around the 20-23 mile point in the race unless the runner conserves energy during the earlier stages of the run.

For his part, Tuttle sees strength and desire as his greatest assets in doing well at the games. Unlike many athletes in other events, he expressed little regret over the Soviet-led boycott of the games, pointing out that the Soviets and their satellites are not the dominating force in the running events that they are in other areas. As a result, their absence will have little effect on the marathon.

As for his own chances, Tuttle refused to make predictions. "I'm just very happy to be going," he said. "I'll give it my best shot and then we'll just have to wait and see."

Math Announces Student Awards

The Department of Mathematics recently named its outstanding student awards for 1983-84. All of the awards carry cash prizes.

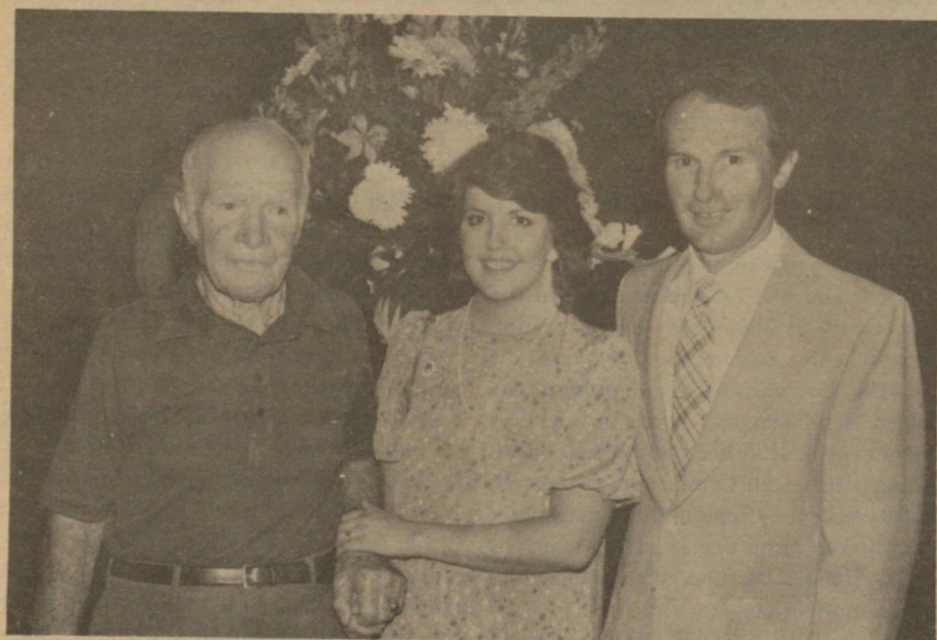

Named outstanding first-year graduate student was Barbara Boyett of Opelika. Andrew Sforzini of Auburn earned the Pi Mu Epsilon Award and the distinction of being named outstanding senior mathematics major. Paul Stallings of Auburn received the Andy Connor Award for creativity.

Susan Weaver of Alexander City was named outstanding sophomore mathematics student, while the outstanding freshman was Monisha Goyal of Auburn.

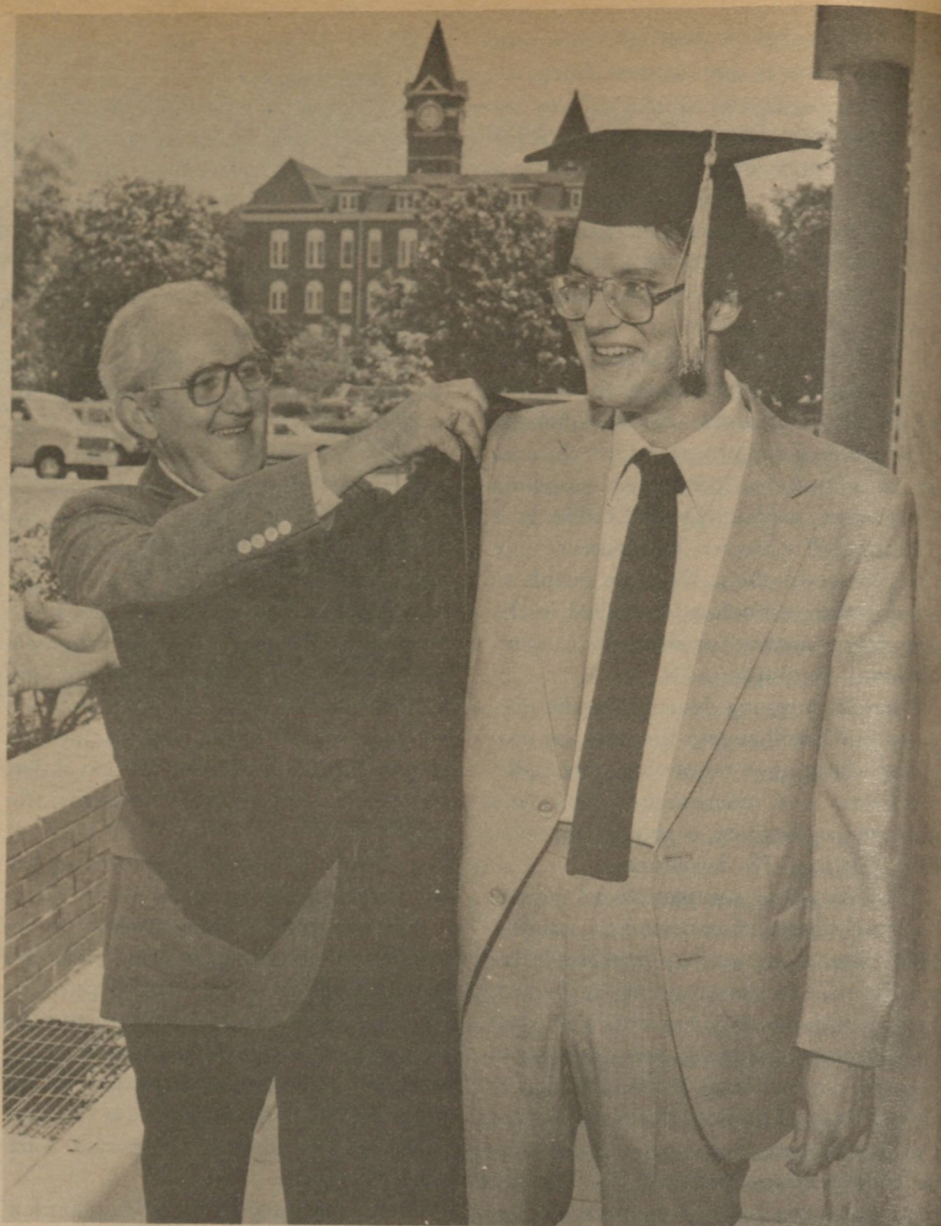

In the calculus contest examination, Mark O'Barr of Shreveport placed first, followed by Eric Steelreath of Mobile in second, and Jeff Ingram of Birmingham, third.

FIRST MASTER OF MIS—Pictured above at a computer system donated to the School of Business by South Central Bell is Virginia M. Davis '82, who in June became the first graduate of one of the Department of Management's newest master's degree programs, management information systems.

SCENES FROM GRADUATION—Among the more than 1500 students to receive degrees from Auburn at June commencement were the six pictured above. Shown top left, before the President's Reception, is journalism graduate Glenn Eskew and his parents Mr. and Mrs. Robert L. Eskew '56 (Martha Bonner '56) of Birmingham; left center, personnel management graduate Allison Watkins with her grandfather, Harry Watkins '22 and father, Harry Watkins, Jr., '57. At bottom left is Ronald Huffman, the first graduate in Auburn's dual degree master's program in architecture and history, with his wife Lillian Graves Huffman, who graduated in landscape architecture. At top right, art graduate Michael McPheeters gets a helping hand from his father, Keith McPheeters '52, dean of the School of Architecture and Fine Arts. And bottom left, Edie Bolton Gibson, a public relations-journalism graduate, gets a headstart on getting to the coliseum. After years of getting around campus with no problems, Edie hurt her foot when she stepped on a fossil while helping husband Mike with a geology survey just days before finals.

Sports

All-Sports Trophy

Thanks to a little help from an unlikely source, Auburn has won the 1983-1984 Bernie Moore Trophy, symbolic of the best over-all sports program in the Southeastern Conference. Had Tennessee beaten the Florida Gators in the championship game of the SEC baseball playoffs, the Volunteers would have taken home the Moore Trophy. Florida's 3-1 victory in that game not only gave them the SEC baseball crown, but also enabled Auburn to edge Tennessee by 1/2 point in the final tabulations for the award. This year's win marks the second time that the Tigers have captured the coveted award, the last time being 1977-1978.

The scoring system for the award gives from 1 to 10 points for each sport according to that sport's finish in the SEC. The winning combination for Auburn was football, 1st; basketball, 2nd; tennis, 1st; swimming, 3rd; track, 5th; golf, 6th; and baseball, 8th, for a total of 51 points.

Of the award, Athletic Director Pat Dye commented, "We're very excited about winning the Bernie Moore Trophy. Everyone here at Auburn can take pride in the win. No one sport can take all the credit because it was a team effort."

Baird Named New Baseball Coach

By Mike Jernigan

If Pat Dye were a baseball coach, he would sound a lot like new Auburn baseball coach Hal Baird. Baird, who was associated with Dye when the two were both coaching at East Carolina, is bringing the same hard work, no-nonsense philosophy to the Auburn baseball program that has been instrumental in the Tigers' football resurgence.

Though Coach Baird and his wife, Janie, have yet to find a house in Auburn, he has been hard at work trying to recruit, meet his players, and get a feel for the Auburn program. The latter task has been especially difficult since Baird assumed the job after the season was over. Even though he has not seen the team in action he feels that he has a good nucleus from which to start.

"It's hard to evaluate the team from the standpoint of talent since I haven't seen them play," Baird said. "But I've met all the players and I know this much, they're good kids and they all are committed to having a winning program."

Baird has his own ideas as far as winning is concerned. His goal is to mold a team that is strong up the middle defensively. Second base, shortstop, centerfield, and catcher are the key positions in Baird's scheme. Combine strength at these positions with good pitching and you have a winning combination. He likens his philosophy to that of professional baseball's Bal-

timore Orioles, a team which has enjoyed continued success over the years.

Baird's defensive ideas extend to offense as well. Although he acknowledges that hitting is the most exciting part of the game from the fan's viewpoint, Baird is quick to return to the subject of defense. "Hitting is the least consistent part of baseball, while pitching and fielding are constants. If you concentrate on taking care of the things that are consistent, the things that you can control, then the offense will take care of itself."

Unfortunately for Baird, the late date on which he assumed the job has hampered him in other areas besides not seeing his team play. The new Tiger coach also got a late start on recruiting. Still, Baird and his staff have signed three prospects who they feel are promising. Infielder Tony Haney and catcher Jeff Livesay both may figure in Baird's plans for the 1985 season. Haney, a versatile player from Richmond, Va., led his high school team to two state titles during his career and batted over .400 during his senior year. Livesay, a catcher from Wanaque, N.J., was a three-year starter in high school where he compiled a career batting average of .462.

The third signee is pitcher Art Stratton from Mobile's Murphy High School. Stratton, a righthander, posted a perfect 9-0 record his senior year, helping to lead Murphy to the Region I title. His earned run average during that time was an excellent 2.85. Coach Baird feels that once he has gained a little college experience, Stratton has a fine career ahead of him.

In the future, Baird hopes to concentrate on pitching and middle fielders in his recruiting. He feels that the Tigers need 7 or 8 good pitchers as well as some depth on the bench to be competitive. Developing bench strength is difficult in college baseball, but it is also vital if one or two key injuries are not to cripple a team's chances. Baird feels that Auburn's strong baseball tradition, much of which was established during Coach Paul Nix's 22 years at the Tiger helm, will be a strong plus in future recruiting efforts.

As for following in the wake of Coach Nix, who stepped down after last season as the winningest coach in the SEC, Baird looks at it as a positive factor rather than one which will place undue pressure on him to produce quickly. "It's a privilege to follow a coach with a record like Coach Nix. The tradition he established at Auburn will help make my job easier, especially recruiting," Baird added that, "Although Nix is a tough act to follow, I'm looking forward to the challenge."

In addition to improving the Tigers on the field, Baird hopes to make some off-the-field improvements as well. Plainsman Park is going to be upgraded during the off-season, with better facilities for the fans being the primary goal. Although attendance has dropped badly during the last few years, Baird feels that a winning team will bring the fans back.

"This is a good baseball area," Baird contends. "We have had support in the past and we can have it again. Promotions like

NEW ORLEANS CLUB—Pictured at the annual New Orleans crawfish boil are top, from left: Carolyn and Bill Hinton '58, Hariett Lowell, and George C. (Rusty) Schlottman '81; 2nd photo, M.W. (Squatty) Lowell '49, Sandy Bowman '71, Nancy Mitchell Morris '64, Dick Allen '63; Mr. and Mrs. Tom Busenleener '64, Bill Abernathy '75 and Claudia Maddox Abernathy '74; Shelby McIntosh '64, Trish McGehee, Ken Bernich '79, and Carol Brelsford Bernich '80.

the San Diego Chicken might fill up a ball park once, but a winning team is the best way to attract fans consistently."

As to just when Auburn will again have a winning program, Baird makes no rash predictions. He has had no chance to scout out the level of competition in the SEC firsthand so it is hard to know just what he is up against. Baird notes, however, that at least one other East Carolinian has found SEC competition to his liking. Though it might take time, Baird promises that the Auburn baseball program will be near the top again in the future. In the meantime, he has another goal which the team can achieve right away.

"We want a baseball program that is representative of the Auburn athletic program overall—one that will make everyone proud. As we work toward that goal, I guarantee that the team will play as hard as they can, with all the hustle and desire that they are capable of. If they do that, winning will follow."

Jackson a Hit With Kids

Running the football is not Bo Jackson's only talent; he also seems to have a special rapport with children. Jackson, Auburn's All-American running back and a leading Heisman Trophy Candidate for 1985, has become increasingly involved in Auburn and the surrounding area with speaking to youth groups about the dangers of drugs and alcohol. He has spoken at several area schools, and recently he was the guest speaker at the Alabama Institute for the Deaf and Blind sports banquet in Talladega. His activities in this area have come to the attention of the NCAA, which has asked him to do a series of commercials on drug abuse which will be aired this fall during NCAA football broadcasts.

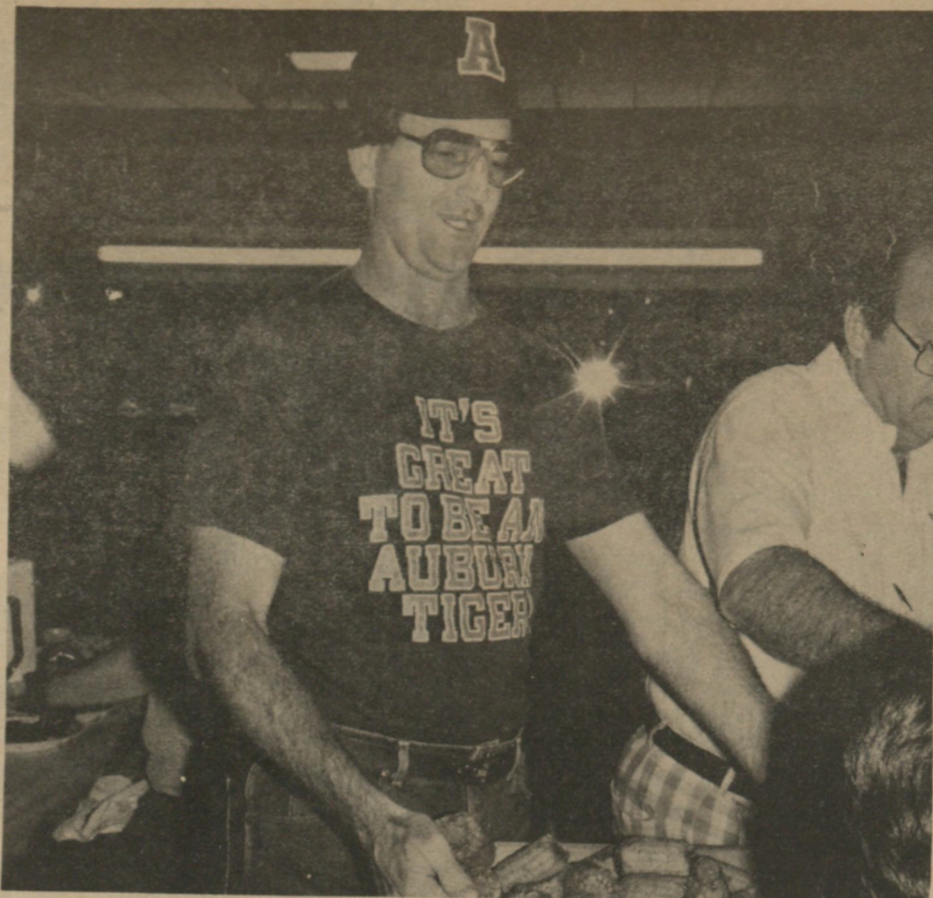

Looking Ahead To Football Competition

By Mike Jernigan '80

I hate to contemplate it, but it's almost that time of year again. The 1984 football season is almost upon us and this year Auburn will be in the spotlight as never before when they open the season against last year's national champions(?), the Miami Hurricanes, on August 27.

I hate to see this pressure-packed season approach. Ideally, there should be two years between college football seasons. That way, those of us who take the game really seriously would have more time to savor the almost religious experience of a team such as last year's SEC and Sugar Bowl champs.

At the very least, scheduling should be arranged so that the really big games are only played on alternating years. I'm still not ready to forget the win between the hedges last year that sealed the title, and the 1982 drought-ending game against the hated Tide can still "make my day." In fact, I prepared myself for writing this article by watching that game on tape.

NEW ORLEANS CRAWFISH BOIL—Pictured at the June 29 New Orleans Crawfish Boil, are, top photo, vice president Don Bowen '72; president Ken Fullerton '71, left, and M.W. (Squatty) Lowell '49; Dr. J. Robert Corcoran '59 and his wife Margaret Moffett '62 (Micki); from left, Nancy Mitchell Morris '64, Cleris Morris '59, Trish McGehee, and Shelby McIntosh '64.

As appealing as enjoying these games a little longer seems, harsh reality dictates that the game must go on. Maybe it's for the best. If I had had my way, last year's dream season would have had to wait while I enjoyed the 9-3 campaign of the year before a few more months. Maybe the upcoming season will dim the last one in a smaller fashion.

The 1984 season appears to shape up on paper as a four team race between Auburn, Tennessee, Florida, and Alabama. All four teams have good depth and a wealth of returning starters from last year. Interestingly, all four teams have to replace starting quarterbacks, and the team which is most successful at this could be the next SEC champ.

Anyway, this is how the 1984 season shapes up. The teams are in order of their predicted finish.

1) Auburn—I'm no doubt biased as to my number one pick, but most of the other pre-season predictions I have read agree on this one. Despite a schedule which is once again among the toughest in the land, the Tigers have an excellent chance to repeat as SEC champions in 1984. In addition, they are also being heralded as the top team in the nation by many. Auburn has the top Heisman candidate in the backfield in Bo Jackson, and the offensive line is big and experienced. The defensive line suffered from graduation, but the secondary is intact and Greg Carr is an All-American possibility at linebacker. The Tigers' season seems to hinge on finding a quarterback to replace the always dependable Randy Campbell. Although Junior Pat Washington has been named the heir-apparent by Coach Dye, his performance was shaky during the A-Day game and he is getting strong competition for the job from Mike Mann and Jeff Burger among others. If Dye can find the answer to the quarterback question, Auburn should be the team to beat in 1984.

2) Tennessee—The Vols are in a similar position to that in which Auburn began last year. Johnny Majors quieted his critics somewhat by guiding Tennessee to a 9-3 record including a victory in the Florida Citrus Bowl (Tangerine) in 1983. The Vols return a number of starters from last year's team including Johnny Jones, the first Tennessee rusher ever to exceed 1000 yards. Unfortunately for Big Orange fans, Alan Cockrell, a pre-season All-SEC pick at quarterback, signed a contract recently with the San Francisco Giants after being drafted in professional baseball's free agent draft. Like Auburn, the Vols will be hunting a quarterback this fall.

3) Florida—The Gators are still living under the shadow of probable NCAA probation but they seem to have adapted nicely. An excellent recruiting class, signed in spite of the probation threat, joins an explosive offense that returns almost intact. Defensively, the Gators lost seven starters so there are definitely some questions that will have to be answered quickly. The biggest question facing Gator boss Charley Pell, however, is who will replace departed All-SEC quarterback Wayne Peace. If they can answer this question and avoid the famous "gator swoon," Florida's schedule is conducive to a run at the title.

4) Alabama—Now that it doesn't seem to matter anymore, Alabama and Georgia finally play each other this season. In the

past, when the two were splitting the SEC championship year after year, they never seemed to meet. Now that it doesn't mean as much, the rivalry is back. Of course the SEC's round robin scheduling was the reason, but it's no coincidence that the two teams were greatly aided by this happy turn in the schedulmaking. Alabama is a question mark this year. They return a number of starters from last year's 8-4 team, but like most of the other contenders, they are looking for a quarterback to replace Walter Lewis. Coach Perkins single-mindedly played Lewis almost every down last year, and the Tide now lacks an experienced backup to take over the job. On the positive side, Ricky Moore returns at fullback to give the Tide some needed depth in the offensive backfield.

5) Georgia—I hesitate to put Georgia down this far because Vince Dooley always seems to come up with something, but this year the task facing him is formidable indeed. The wonder class of 1984, which helped Georgia to a 43-4-1 record during its tenure along with three SEC crowns and a national championship, is gone at last. In its place the Bulldogs return only a few starters from an offense that, after last year, most Georgia fans were glad to see go. Defensively, the Dawgs were again hurt by graduation, losing the likes of Freddie Gilbert and Tommy Thurson. On paper, things look grim for the Bulldogs, but then everyone thought that last year after Herchel left.

6) LSU—After a dismal 4-7 season last year, the Bengals have a new coach to try to return the LSU program to first rate status. Bill Arnsbarger should be able to turn things around soon if his years with the Miami Dolphins are any indication of his talents, but it will probably take the Bengals a season or so to adjust to a new system. Still, the offense returns nine starters including the talented backfield duo of Dalton Hilliard and Garry James while the defense boasts eight returnees. With such a wealth of experience to work with, Arnsbarger and Co. might surprise a few opponents this year.

7) Ole Miss—The Rebels went through an adjustment period with a new coach last year and came out of it quite well, going to their first bowl since 1971. They return 14 starters from that team, including an experienced quarterback in Kent Austin. Unfortunately, the Rebels' schedule is a tough one, with Auburn, Arkansas, LSU, and Tennessee on tap.

8) Kentucky—Eighth may be too low for the Wildcats after a respectable 6-5-1 showing last year and a bid to the Hall of Fame Bowl. The Cats return most of their receiving corps along with a strong-armed quarterback in Bill Ransdell. The worst problem for Coach Jerry Claiborne and his staff will be finding new linemen to replace a host of graduates on both offense and defense.

9) Vanderbilt—The Commodores always seem to be the hard luck team of the SEC and this year is no exception. While the offense returns 8 starters from last year's potent unit, the defense has almost ceased to exist due to off-season injuries. Sixteen Vandy players missed spring practice due to injury, and when a team suffers anyway from a lack of depth as does Vandy, such casualties can be fatal to a season. Vander-

bilt's schedule, which includes six bowl teams from 1983, also figures to add to the Commodores' woes.

10) Mississippi State—The Bulldogs of Coach Emory Bellard have enough problems for two teams as they head into 1984. On offense, the search is on to find a successor to John Bond, a four year starter and the finest quarterback in State's history. Once found, the new QB must lead the offense in a transition from the Wishbone that the Bulldogs have run the last five seasons to the I-formation. As if that weren't enough, the defense returns only three starters as well. Youthful enthusiasm is fine, but it rarely wins football games against talented and experienced foes, a lesson the Bulldogs will probably learn the hard way in the coming season.

Football Review *Auburn '84*

For those who want an in-depth look at the upcoming Tiger football season, *Auburn '84* will be available on newstands throughout Alabama during early July. The publication, which includes player and coach interviews as well as statistics and predictions, is put together by an outfit which includes several Auburn-affiliated people. Lyn Scarbrough '69, Paul South '80, and Myers Hyche, a former *Plainsman* sports editor, all collaborated on the publication.

If a copy is not available in your area, the magazine can be obtained by sending \$3.00 to: *Auburn '84*, P.O. Box 59238, Birmingham, AL 35259-9238

Also available from the same publisher is *SouthSports*, a 32 issue-per-year periodical covering all major sports in the Southeastern Conference. Subscriptions may be obtained from the same address at a cost of \$21.00 per year.

Band Plans Canned

It appears that the Auburn Band will not be making the trip to Texas for the September 15th Auburn-Texas game as was originally planned. Due to financial considerations, the trip has been written out of the band's budget for the upcoming year. Those who attended last year's game or watched on television will remember that the Texas band did make the trip to Auburn where they put on an excellent performance.

Penn State Cancels Auburn Series

The Auburn Athletic Department recently announced that Penn State has dropped the Tigers from its 1986 and 1987 football schedules. Penn State did not feel it was in their best interests to play two SEC schools in the same year and the Nittany Lions had already committed to games against Alabama during the years in question. East Carolina, where Pat Dye earned his first head-coaching job, will replace Penn State on the 1986 schedule. A replacement for 1987 has yet to be determined.

HEY DAY! IN HOUSTON—The Houston Auburn Club recently resurrected an old Auburn tradition known as Hey Day and combined it with their second annual Bubba Awards. In the top photo are officers Danny McDaniel '79, treasurer; Mary Peinhardt Smith '78, newsletter chairman; Roy Nelson, social chairman; guest speaker John Cochran; Dave Ostrowski '77, vice president; Becky Arrington '73, president; and Jackie Morris, secretary. Standing in front of the Phil Neel banner given to the club by the Jefferson County Club are Bubba Winners Joe Johnson, Mary Peinhardt Smith '78, Mike Pisani '75, Nathan, Debra, and Donny Jones '75, Kathryn Fowler '78, Alex McDonald '80, and Greater Augusta Club President Carl Cole '49. Not pictured is Bill E. Mattison '53. Alex McDonald presents the Club's first Bubba Family Award to the Joneses—Nathan, Debra, and Donny Jones '75. At bottom are a trio of Houston Club presidents: past president Molly Sarver Boren '61, current president Becky Arrington '73, and past president Robert Walker '50.

In Memoriam

Charles B. Martin '13 of Peterborough, N.H., died recently in the VA Medical Center in Manchester, N.H. He had been district sales manager of the northeastern sales district of American Cyanamid Co., organic chemicals division, explosives department. An avid sportsman and outdoorsman, he had served with the Army in World War I. Survivors include his wife, Ruth Harrison Martin; a son, Dr. Charles H. Martin of Mattapoisett, Mass.; a daughter, Mary Martin Meredith of Barnstead, N.H.; a brother, Lee Martin; and two sisters, Sabra M. Harris and Willie M. Parsons, all of Alabama.

Hugh W. Agricola '16 of Gadsden died June 18. He had been active in a number of businesses in Gadsden and owned and operated the Mt. Meadow Guernsey Farm and the Agricola Brick Co. He was president of First National Bank of Gadsden from 1939 to 1972 and at the time of his death was president of Agricola Shopping Center. Survivors include his daughter, Joyce Agricola Parker of Gadsden; a son, the Rev. Hugh W. Agricola of Guntersville; four grandchildren, Mary Linda Parker of Nashville, Claire A. England of Martinsville, Va., John Disque Agricola of Jackson, Miss., Camelia A. Bowman of Greensboro, N.C.; and four great-grandchildren.

John Andrew Douglas '17 of Mobile died May 5. He is survived by his wife, Estelle Douglas, of Mobile. In World War I he served as an ensign in the Navy after which he did graduate work at Iowa State University, receiving a master's in electrical engineering. For a short time he taught in the Mobile Public School System then joined the engineering firm of J.B. Converse Co., retiring in 1965.

Willis Morton Ray, DVM, '23 of Saraland died April 12 in Dothan. He lived in the Saraland-Mobile area for the past 14 years. Dr. Ray played football at Auburn in 1922-23 under Coach Donahue, served in the Navy in 1917-18, and was a Life Member of the Alumni Association. He is survived by three sons, Jim Morton Ray of Dothan, Edwin Wood Ray '49 of Atmore, and Dr. Joseph Byron Ray of Mobile, and eight grandchildren.

Charles Henry Colvin, Jr., '26 of Birmingham died April 25. He was retired vice president of Young and Vann Supply Co. He had been an Active Member of the Auburn Alumni Association for 29 years and was past president of the Southern Industrial Distributors Association and was a warden emeritus of the Cathedral Church of the Advent. Survivors include his wife, Martha Coffee Colvin; three sons, Charles Henry Colvin, III, and Robert Coffee Colvin '62, both of Birmingham, and William Given Coffee of Chattanooga; four sisters and two brothers, including Robert E. Colvin '43 of Villa Rica, Ga.

Aurelius C. Hagood, DMD, '29 of Johnson City, Tenn., died September 22, 1983, after a long illness. He received his dentistry education at Emory University and retired in 1972 after forty years of practicing dentistry in Alabama and Tennessee. His career included 15 years of private practice, five years with the Army, and the last 20 years with the Veterans Administration Medical Center in Mountain Home. Dr. Hagood, who received the Purple Heart in 1942, was with the Army Dental Corps in North Africa and Sicily with Gen. George Patton. He was a deacon of Central Baptist Church and a Life Member of the Auburn Alumni Association. Survivors include his wife, Beatrice Hagood; two daughters, Mrs. Larry Coats of Columbia, Mo., and Ellen Hagood of Johnson City; his stepmother, Mrs. Burford Hinson of Brewton, Al., two grandsons, Wesley and Michael Coats of Columbia; and several nieces and nephews.

R. Porter Grant '33 of Dothan died May 25 after an illness of several months. After graduation he worked as a football coach at both Auburn and the University of Kentucky. In December 1940 he joined the Army and served until his retirement in 1970, spending the last ten years with the Mississippi Army National

Guard, and the last five as assistant adjutant general of Mississippi. He retired and moved back to his hometown of Dothan, where he was immediately named executive director of the United Fund of Dothan. He was also chairman of the Jobs for Veterans Task Force and a member of the Chamber of Commerce Military Affairs Committee. A Life Member of the Auburn Alumni Association, he had played both football and baseball at Auburn and was named All Southern End. Gen. Grant is survived by his wife, Jimmie Bell Grant; two sons, Russell Porter Grant, Jr., '62, and John Adam Grant, both of Jackson, Miss.; two grandchildren, Russell Porter Grant, III, and Kimberly Elizabeth Grant, both of Jackson; and two sisters, Mary Bess Evans and Lucille Bowden, both of Dothan.

Paul D. Owens '33 of Brewton died May 7. Survivors include his wife, Mrs. Eddyree Hubbard Owens; two sons, Paul D. Owens, Jr., and Hubbard Owens of Brewton; a brother, George Owens of Houston, Tex., and five grandchildren. Mr. Owens was a retired district superintendent of the Alabama Tax Division and a member of the First United Methodist Church.

A. Wilton Kilgore '37 of Atlanta died May 7. He was an Active Member of the Auburn Alumni Association. Survivors include his wife, Kathryn Keegan Kilgore; a daughter, Sandra Arnold of Springfield, Va.; a son, Jon W. Kilgore '65 of Lilburn, Ga.; a sister, Mrs. Gatha Beorugher of New Smyrna Beach, Fla.; a brother, Gene Kilgore of Bynum; and five grandchildren.

Mary Elizabeth Morgan '46 of Biscayne Park, Fla., died Sept. 24, 1983. Chairman of the physical education department at Filer Junior High in Hialiah, Fla., for many years before ill health forced her to retire on Feb. 1, 1983, Miss Morgan received a master's in physical education from George Peabody College for Teachers in Nashville. She then became supervisor for student teachers at Iowa State Teachers College in Cedar Falls, Iowa. She returned South to spend four years at Moultrie High in Moultrie, Ga., where her girls basketball teams won state championships in 1954 and 1955. She taught a year in Jacksonville, Fla., before moving to Filer Junior High, which honored her last June with the Mary Elizabeth Morgan Excellence in Athletics Award. Her friends Mrs. Kathryn A. Gibson and Mr. and Mrs. Alvis Fielding Wales, Jr., '72 (Kathy Gibson '73) have established the Mary Elizabeth Morgan Memorial Scholarship Endowment at Auburn in her honor. Miss Morgan's survivors include a sister, Louise Morgan Kent; a brother, Malvern C. Morgan '39, both of Lanett; a nephew, J. Mailon Kent '63 of Birmingham; and two nieces, Judith Morgan Brown '63 of Birmingham and Nancy Morgan Wal-drep '65 of Columbus, Ga.

William Perry Lamar '49 died in Lake Wales, Fla., on April 9. A Life Member of the Alumni Association, Mr. Lamar is survived by his wife, Doris White Lamar '39.

Leland Clark Gravlee, MD, '51 of Birmingham died May 26 in a plane crash in Fayette County. A gynecologist at South Highlands Hospital, he invented the Gravlee Jet Washer, a device used in many hospitals to test women for cancer, and the Gravlee Gun, a device that automatically ties the umbilical cord at birth. Dr. Gravlee served on the executive committee of the medical staff at South Highlands Hospital for 10 years, was a former board member of the State Health Planning and Development Agency, and was a Life Member of the Auburn Alumni Association. Survivors include his wife, Catherine; a son, Leland Clark Gravlee, III, of Birmingham; two daughters, Dr. Lucy Anne Gravlee of Birmingham and Mrs. Jan Gravlee Cloud of Huntsville; a brother, Dr. Joseph Frank Gravlee '50 of Florence; a stepson, Marvin Glenn Perry, Jr., of Birmingham; and a stepdaughter, Catherine Comer Perry of Birmingham.

Horace H. (Mickey) Pearson '57 died on June 4 in Mississippi Baptist Medical Center in Jackson, Miss. He was a member of Sigma Chi

Fraternity and ROTC at Auburn, and was later in the Army, Army Reserves, and on the Army National Rifle Team. Mr. Pearson was active in his church as a deacon, Sunday school teacher, and Sunday school superintendent. He was a former sales representative of Natco Corp. in Pittsburgh, Pa., and Thrasher Co. of Jackson, Miss., for 15 years. In 1976, he co-founded Contract Hardware, Inc., and was co-owner and vice president. He served on the advisory board and the board of directors of the Jackson Youth for Christ for 10 years and coached Minor and Little League baseball and soccer. He is survived by his wife, Paula Leigh Pearson; two daughters, Leigh and Elizabeth, both of Jackson; a son, John Will Pearson of Jackson; parents, Mr. and Mrs. H.H. Pearson of LaGrange, Ga.; and a sister, Patricia Grant of Palm Springs, Calif. He was an Active Member of the Alumni Association.

Andrew C. Connor '62 of Auburn died in May. He was a Life Member of the Alumni Association. Survivors include his mother, Mrs. George Connor of Montgomery, and a brother, Dr. Robert B. Connor '68 of Birmingham. At the time of his death, Dr. Connor, who held a Ph.D. from the University of Georgia, was a visiting professor in the Auburn Math Department. He also had served on the mathematics faculties of the Universities of Wisconsin, Illinois, and Houston as well as Sumter College in South Carolina. His colleagues at Auburn established the Andrew Connor prize for creativity and originality to honor him.

Jacquelin Jackson Norman '62, executive director of the Auburn Chamber of Commerce, died May 16 after suffering an aneurism. A partner in the gift shop, The Back Porch, she had taught at several schools in the Auburn area before joining the Chamber of Commerce. At the time of her death she served on the administrative board of the Auburn Methodist Church, and was an alumni advisor for Mortar Board and secretary of the Auburn Industrial Development Board. Mrs. Norman is survived by her husband, Dan Norman '64; two sons, Drew and John Norman, all of Auburn; her mother, Cora Lee Newell of Anniston; and a brother, Bill Jackson of Anniston.

Robert Bruno Boettcher '64, a former State Department official and Congressional staff employee who directed the investigations into the Korean influence-buying scandals in the late 1970s, died May 24 of injuries suffered in a fall from his apartment building in New York City. A Life Member of the Auburn Alumni Association, Mr. Boettcher was at the time of his death executive director of the Harlem Dance Theatre. After graduating from Auburn, Mr. Boettcher completed the Georgetown University School of Foreign Service. He joined the State Department in 1966 and served in Vietnam and Japan and later as staff assistant to the Assistant Secretary of State for International Organization Affairs. He left the State Department in 1971 to become staff director of the subcommittee on international organizations of the House Foreign Affairs Committee and after directing the investigation into the Korean-influence buying scandals co-authored *Gifts of Deceit*. He is survived by his father, Col. R.B. Boettcher of Destin, Fla.

Gene Patrick Gissendanner '65 died in his home in Memphis, Tenn., on May 30. He was a senior project chemical engineer with W.R. Grace Co. and an Active Member of the Alumni Association. He is survived by his wife, Mary; daughters, Dana and Julie of Memphis; parents, Mr. and Mrs. O.D. Gissendanner '38 (Frances Olivia Fore '41) of Leroy; and brother, Jimmy Gissendanner of Leroy.

Vickie Lynne Foshee Mullins '73 died of leukemia on Sept. 9, 1983, in Gainesville, Fla. She is survived by her husband, Marion D. Mullins, Jr., '73, now of Boaz.

Janis Marie Vines '75 of Birmingham died April 29. She was interior designer with Showcase, and taught interior design at Southern Institute. A Life Member of the Alumni Association,

she was a member of Ruhama Baptist Church. Survivors include her parents, Mr. and Mrs. James H. Vines, and two brothers, Jim and John Vines, all of Birmingham.

Faculty Notes

Continued from p. 3

thermal sciences, including solidification heat transfer, thermal stresses, and robotic welding. Dr. Madsen came to Auburn in 1978, and his varied research includes biomechanics, numerical welding, and computer-controlled welding.

Class Reunion Schedule

Although details will be forthcoming, the tentative schedule for class reunions next fall has been set. Those of you who like to plan ahead can mark your calendars as follows:

September 22, Southern Mississippi Game, Class of 1932.

September 29, Tennessee Game, Class of 1959.

October 20, Georgia Tech Game, Classes of 1939, 1944, 1969, and 1974.

November 10, Cincinnati Game, Class of 1934.

November 17, Georgia Game, Classes of 1924, 1929, and 1964.

Thirteen Named To Graduate Faculty

Faculty recently appointed to the Graduate Faculty include: Donald F. Buxton, anatomy and histology; Margaret Craig-Schmidt, nutrition and foods; Malcolm Crocker, mechanical engineering; Kermit R. Davis, Jr., management; Charles H. Gilliam, horticulture; Alan H. Glasser, physics; Bobby Lanford, forestry; Nels Madsen, mechanical engineering; Robert S. Montjoy, political science; Edward J. Parish, chemistry; David Bruce Weaver, agronomy and soils; Glenn Wehtje, agronomy and soils; and John S. Westefeld, counselor education.

Olympic News Mixed

There's good news and bad news for Tiger fans hoping to watch Auburn athletes compete in the upcoming Olympic Games. On the positive side, former Auburn track star Harvey Glance will be a member of the U.S. 400-meter relay team. Glance, a gold medal winner in the 1976 Olympics and a member of the 1980 team which did not compete due to the U.S. boycott, failed to make the team during the recent trials but was added after another member of the team dropped off to concentrate on a different event. Glance will join two other Auburn-affiliated athletes, marathoner John Tuttle (See story, pg. 11) and swimmer Rowdy Gaines, in Los Angeles.

Unhappily, sophomore basketball forward Chuck Person was not so fortunate. Person joined former Auburn teammate Charles Barkley in being dropped from Coach Bobby Knight's Olympic squad when he was passed over in the final cut. He will remain with the team as one of two alternates, however, and will play in case of injury to one of the twelve starters.

Alumnalities

1928-1937

Thomas H. Hendrix '28 is retired and living in Yazoo City, Miss., with his wife, Margaret. They have celebrated their 56th wedding anniversary. The Hendrixs have a granddaughter, Margaret Newman, studying interior design at Auburn.

John H. Thompson '31 retired as a rural mail carrier in 1978. He lives in Weogufka.

W. Huntern Smith '34 of Valley retired recently after 28 years in the ministry. He was minister of the Fairfax First Christian Church at the time of his retirement. The Rev. Smith plans to attend his class reunion this fall.

Mary Jim Enloe Coleman '36, former assistant director of home economics for the Alabama Cooperative Extension Service, received the Alumna of the Year Award at the annual meeting of the Auburn University Home Economics Alumni Association. Mrs. Coleman retired in 1973 after serving 32 years with Extension.

Alfred C. Daves '30 of Mobile is engaged in real estate and farming. His daughter Harriet is a senior in pre-veterinary medicine at Auburn.

Richard J. Wood '30 of Bluefield, W. Va., retired as president of Pemco Corp. in February. He was co-founder and president of Pemco for 23 years. The company is a national supplier of mining electrical equipment. At the time he helped form Pemco, Mr. Wood was assistant district manager of Appalachian Power. He will remain a consultant to the company and was elected chairman of the board emeritus. In addition to his business work, Mr. Wood was past commander of the Riley-Vest Post of the American Legion and past president and director of a number of civic and professional organizations. He is currently a director of First National Bank of Bluefield and Bluefield Hardware Co. He and his wife, Elizabeth, have three children: Diana, a dentist in Birmingham; David, a Presbyterian minister; and Hugh, a lawyer.

Joseph A. Zwinakis '37 of Amherst, Mass., is retired from Springfield Armory where he was in charge of quality and reliability. He is also a retired colonel from the Army Reserve. He has two children: a son living in Falmouth, Mass., and a daughter living in Chapel Hill, N.C.

1940-1949

Charles T. Higgins '41, executive vice president of the Alabama Easter Seal Society, received the seventh annual Myrtle M. and Tom B. Medders Award for outstanding performance

MANAGER—**Michael A. Piazza '54** is new assistant works manager at Tennessee Eastman Co., a division of Kodak. He had been general manager of the company and director of operations for the Holstun Defense Corp. since 1979.

by an Easter Seal executive director. The award, presented at the group's annual convention, recognizes outstanding achievement in support of voluntary services to disabled people in the community where they live. Mr. Higgins has been with the Alabama Easter Seal Society since 1956 and has been executive vice president since 1973. He is past president of the National Easter Seal Executives Association and was recently honored by that group. Mr. Higgins is on the board of directors of the Montgomery Rotary Club and active with the Alcazar Shrine Temple where he is president of the Brass Band.

Dr. J. Roland Clanton '43, retired veterinarian of Thomasville, Ga., recently received the third annual Heritage Award at the Thomas County Community College's annual honors program. The Heritage Award is "the highest award bestowed on a friend of the college." A member of the college board of trustees since 1975, Dr. Clanton is also chairman of the special gifts division of the Eighties Unlimited building fund drive now underway. Under his leadership, the division has already reached 101 percent of its goal. Dr. Clanton is past president of the Thomasville-Thomas County Chamber of Commerce, the Georgia Veterinary Medical Association, the Thomasville Kiwanis Club, and the Central High Boosters' Club. A former Thomasville Kiwanian of the Year, Dr. Clanton has been on the board of the Thomas County chapter of the American Red Cross and been chairman of the Thomas County Board of Health. The Thomasville Exchange Club dedicated the 1981 Deep South Fair to him. In making the presentation of the award to Dr. Clanton, Eugenia Smith, chairman of the board of trustees, said, "The person receiving this award does not seek the limelight, but he's usually in it anyway. He's deeply respected and loved in this community, and for more than a decade he has given his time, talents, and resources to help the college."

Theo H. Coleman '43, a poultry geneticist in the Department of Animal Sciences at Michigan State University, has been given the Senior Class's Outstanding Faculty Award for 1984. Dr. Coleman was honored at a reception at the University Club on May 17. Student organizations nominate faculty for the award, based on ability to relate to students, teaching skills, publications, research, and public service. Dr. Coleman, who has taught at Michigan State since 1955, holds two degrees from Auburn and the Ph.D. from Ohio State. He is author or co-author of a number of articles and studies in poultry genetics.

Clifford Allen Webb, Jr., '44 of Hattiesburg, Miss., is manager of environmental affairs for South Mississippi Electric Power Association. He is married to Elaine Hill '46, and they have three daughters.

Elaine Witner Mason '44 retired in 1965. She is active in Silver City, N.M., Chamber of Commerce and in the Silver City Woman's Club. She has been making yearly overseas trips for the past 11 years, including a study tour to the U.S.S.R. as well as several trips to Europe and tours to Egypt, the Orient, the South Pacific, South Africa, and Kenya.

Katherine (Kay) Hall Plage '44 of Atlanta is financial officer in the family Kwik Kopy business. Her husband, William, is semi-retired but helps in the business part-time. The Plages have three sons, including **Richard Avery Plage '78**, and three grandchildren.

Mildred Hansford Lynch '44 lives in Albany, Ga., where both she and her husband, Claud, are real estate agents. They have two children, Dr. Edwin H. Lynch and Susan M. Lynch '79. Mrs. Lynch is with Hicks Realty in Albany.

Elizabeth May Jones Stewart '44 of Huntsville retired from teaching in 1982. Her husband, **Alton Stewart '42**, retired from the Army Missile Command at Redstone Arsenal in 1973. They have two children, **Robert Ernest Stewart '71** and **Neata Stewart Bass**.

FORESTRY GRADS WIN AWARDS—Auburn graduates took most of the awards at the 1984 annual meeting of the Alabama Forestry Association. From left are **Bill Tomlin '70**, a forester with SACO Wood in Prattville, who received a special award for contributions to forestry and the Alabama Tree Farm Program, of which he has been chairman for the past two years; **Dr. Jim McLelland '64** of Fairburn, Ga., who received the Outstanding Tree Farmer of the Year Award for his achievements in conservation practices on his 815-acre farm in Bullock County; **Gary Heine-mann**, chief executive officer of the Container Corporation of America; and **Ronald E. True '69**, forester with Alabama River Woodlands, Inc., in Monroeville, who is the incoming chairman of the Tree Farm Committee for the next two years and who received a special award for his contributions to Alabama forestry. Not shown is **Bob DeVaughan '74**, forester with the Alabama Forestry Commission who was named "Outstanding Tree Farm Inspector" for recertifying more than 50 tree farms in 1983.

Dr. Lawrence Pease '45 of Lafayette, La., retired in 1978 as head of the Department of Animal Industry at the University of Southwestern Louisiana, which has recently been renamed the University of Louisiana. Since his retirement, Dr. Pease's hobby has been the study of the early records of beef cattle herds at the USL, particularly the angus cattle.

Col. Irvn R. Cooper, Jr., '44 retired from the Army in December 1980 after 33 years of active service. He was assigned to numerous locations in the States, and his overseas tours included Korea twice, Germany, Okinawa, and Vietnam. Among his assignments as veterinary staff officer was that of chief of the food inspection policy branch, Assistant for Veterinary Services, Office of the Surgeon General in Washington, D.C., and staff officer with the Veterinary Service Division of the Health Services Command at Fort Sam Houston, Tex. At the time of his retirement he was commander of veterinary activity at Brooke Army Medical Center at Fort Sam Houston. Among his medals are the Legion of Merit with two oak leaf clusters and the Bronze Star. Col. Cooper has three sons—two of whom are Air Force pilots—and an infant grandson.

Dame Scott Hamby '46, dean of the School of Textiles at North Carolina State University, received the honorary doctor of textiles from the Philadelphia College of Textiles and Science at the college's commencement ceremonies on May 13. In addition to being dean of the School of Textiles, Dr. Hamby is also associate dean for Academic Affairs and Extension Programs. An active consultant in textile quality control and measurement systems and in textile technology, Dr. Hamby is author of *The American Cotton Handbook* and co-author of *Textile Processing of Continuing Filament Yarns* and *Handbook of Textile Testing and Quality Control*. He is a Fellow of the American Association for the Advancement of Science, The Textile Institute, and the American Society for Quality Control. He is on the board of directors of Tuscaroro Cotton Mills, Oakboro Mills, and Tuscaroro Yarn Sales.

Piper M. Osborne '46 retired at the end of April after 30 years in the textile finishing busi-

ness. He continues to work part-time at King Finishing Plant in Statesboro, Ga.

Martha Irene Goyette '46 received the Master of Divinity from Wesley Theological Seminary in Washington, D.C., on May 7.

Kathleen Walker Duncan '46 and her sister, Evelyn Chappell, share an apartment in Memphis, Tenn.

Walter G. Crumpton '47 is doing aerospace technology consultation for Indiana University at NASA/Marshall Space Flight Center in Huntsville.

Robert Cook '48 of Atlanta has completed 36 years with Dun & Bradstreet. His wife, **Katherine Finegan '46**, retired from 28 years of teaching with the Fulton County School System. The Cooks live in Sandy Springs and enjoy traveling and their four grandchildren.

Donald Joseph Seidert '48 of Burlington, Iowa, has retired from General Electric after 34 years. He plans to move back to Georgia soon.

Bob Bedwell '49 is one of 25 members of the Agents' Advisory Council of New York Life Insurance Co. He is a president's councilman and life member of the company's councils. He is past president of a number of industry associations, including the Leading Producers Roundtable and the International Association of Health Underwriters. Mr. Bedwell maintains offices in Montgomery and Andalusia and serves clients in Alabama, Georgia, and Florida.

Charles O. Pyron '49 of Jackson, Mich., has been named the Michigan Small Business Person of the Year. He was honored May 1 by the U.S. Small Business Administration at ceremonies in Lansing, Mich. Mr. Pyron is president of ADCO Products, Inc., makers of automobile, marine, and architectural sealants, and is chairman elect of the Greater Jackson Chamber of Commerce. He and his partner started ADCO Products in 1971. The company lost money for two years before sales started growing to reach nearly \$10 million in 1983. The company now employs almost 100 people. Mr. Pyron is married to **Maritom Kirby**, whom he met at Auburn.

William M. Perry '49 of Smyrna, Ga., is deputy chief project engineer with Lockheed Georgia Co. He has been with the company 30 years.

Lt. Col. Arnold S. Hooks, Jr., '49 of Dayton, Ohio, retired from the Air Force in 1973 and began teaching business education courses in 1974 at Tecumseh High School in New Carlisle, Ohio. He retired from teaching for health reasons in 1983. He has also activated his public accountant's license and has a small tax accounting practice as well as being active in the Public Accountants Society of Ohio. In his spare time, he gardens and plays golf.

John C. Russell '49 retired from the Florida Cooperative Extension Service on December 31 as county Extension director IV in Quincy, Fla. He continues to live in Quincy.

1950

Paula Woods Payte is a claims specialist with the Social Security Administration. She and her husband, John, who recently retired from State Farm, live in Birmingham.

Mary Hunta Owens is the director of social services at the Clover Bottom Developmental Center in Nashville, Tenn. She is also the secretary of the Greater Nashville Auburn Club. She has two children, Robert Ham, Jr., '79, and Martha Ham.

Thomas B. Kennedy lives in Monroeville where he is the manager of logging and fiber supply with International Paper Co. A past president of the area Auburn club, he and his wife, Ann, have three children: Thomas '82; Gretchen, an Auburn junior; and Patricia, an Auburn sophomore.

Marion D. Monk is a district forester with the Alabama State Forestry Commission. He and his wife, Mona, live in Ozark where he is active with Gideons International.

Boyd E. Christenberry is executive vice president of sales and marketing with the Alabama Farm Bureau Insurance Co. He and his wife, Sara, have four children: Robert, Kathryn, Sandra, and William. The first two are Auburn graduates while the latter two are presently attending Auburn. Boyd and his wife live in Montgomery, where he is active in a number of organizations including the United Fund, Toastmasters, and the Y.M.C.A.

Preston E. Williamson of Marietta, Ga., is an assistant vice president of South Central Bell. He and his wife, Betty, have two children, Cynthia and Alan.

William D. Tanner, Jr., is presently living in Sunnyvale, Calif., where he is a past president of the local Auburn club.

Col. William L. Martin has relocated to Virginia Beach, Va., from Gastonia, N.C. He and his wife, Jerry, have three children—William, III, Gladys, and Mary.

Joe J. Burnett, Jr., is the president and owner of Burnett Equipment Co. in Birmingham. He and his wife, Jean, have three children—Diane, Steve, and Bill.

Richard M. Lightfoot recently retired from Civil Service after working the past 21 years at Fort Rucker. He lives in Troy, and he and his wife, Dell, have two children—Richard and Della Sue.

Henry H. Horton, Jr., and his wife, Lunell, live in Friona, Tenn., where he is the president of the Parmer County Pump Co. and the Parmer County Drilling Co.

Billy G. Collier is a utilities engineer with the Georgia Public Service Commission. He is also active with the Boy Scouts and a past president of the Cobb County Auburn Club. He and his wife, Selma, have three children—Nancy, Robert, and Sandra.

Robert L. Key is a tool and gauge technician with the Thiokol Corp. in Huntsville. He is interested in forming a Lawrence County Auburn club.

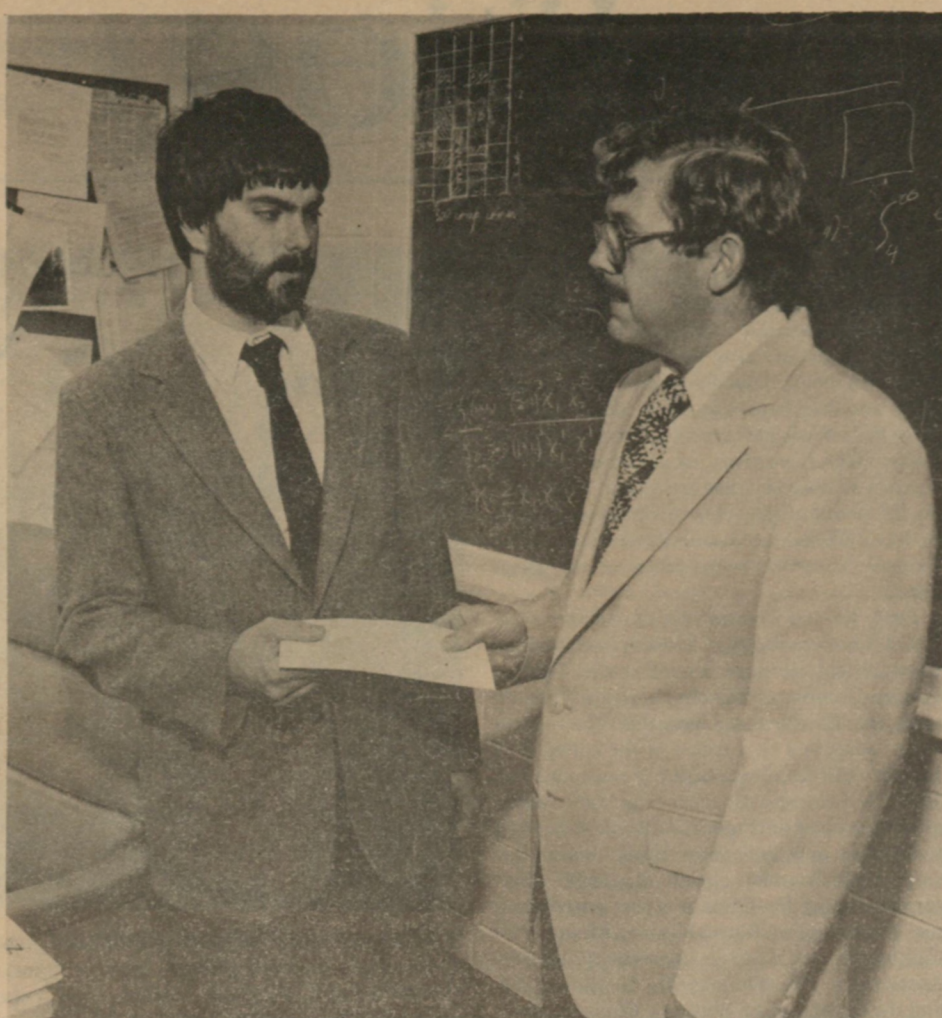

Glenn E. Wright retired in 1974 as president of Orlando Industries, Inc., in Orlando, Fla. He and his wife, Jackie, have two daughters—Barbara and Donna.

1951

Dr. Clarence H. Roy of Port St. Lucie, Fla., operates Rainbow Research, Inc.

C. Tim Russell is public works coordinator for the City of Thomasville, Ga.

Graham Milton Everidge and his wife, Barbara Vinson, live in Huntsville where he is forecasting manager for South Central Bell. He

MATH CREATIVITY—Paul Stallings, left, recently received the Andy Connor Award for Creativity in Mathematics. Making the presentation is Dr. Jack Brown, head of the Department of Mathematics. The award is a memorial to Dr. Connor, an Auburn alumnus and former faculty member who died May 6. Paul is an Auburn junior in math who spent his first six years of school in Tanzania and says he didn't learn any new math until he came to Auburn in the sixth grade. He has constructed complicated sets of numbers to answer class questions and has proved several mathematical "problems" in original ways.

belongs to the Huntsville Home Builder's Association and the Huntsville, Alabama, and National Real Estate Associations. The Everidges have five children—Ellen, Katherine, Jim '81, Roy, and Beth.

Bruce Holding Cousins of Enterprise is district accounting manager for Alabama Power Co. He has two daughters, Dana and Becky '82.

Sarah Moore Wiggins and her husband, Agee Wiggins, DVM, '46, live in Auburn. They have two daughters, Suzanne Wiggins Jagar '76 and Caroline Wiggins Smith.

Salvador A. Marino is electric system planning manager for Alabama Power Co. in Birmingham. His other business interests include real estate, the stock market, and various investments. He is director of APCO Employees Credit Union and a member of EEL System Planning Committee. He and his wife, Josephine, have three sons, Joseph, Anthony '84, and Salvador.

Mary Moran Shivers of Daviston is biology instructor for Southern Union Junior College in Wadley. She farms and gardens on a small scale and owns and manages timberland. She is a member of the board of directors for both local and district levels of the Cottaquilla Council of Girl Scouts and a member of the Alabama Environmental Quality Board and Alabama Wildflower Society. She has four daughters: Charlotte, Sharon, Cheryl, and Sheila.

Reginald W. McLaney lives in Huntsville with his wife, Marie. They have four children—Deborah M. Watts '78, Stacy, Regina, and Stephanie. He retired in 1975 as chief of test and targets division in the U.S. Army Ballistic Missile Defense System Command.

Robert M. Winter is construction manager for Jonathan's Landing in Tequesta, Fla., where he lives with his wife, Helen. They have three children—Clare, 16, MaryEllen, 13, and Patrick, 12.

Grace Meadows Prince is county agent in Butler County for the Cooperative Extension Service. She is a member of the Choctaw County Cancer Society, Alabama and National Extension of Home Economists, Epsilon Sigma Phi, and Choctaw County Business and Professional Woman's Club. She and her husband, Jimmy, have two daughters—Suzanne '84 and Jamie, an Auburn student.

Beverly Benson Nevins and her husband, Crawford Nevins, live in Birmingham. They have three children—Crawford Benson Nevins '77, Nancy Allyn Nevins '77, and James Holder Nevins '81.

Dr. Allen W. Jones is professor and archivist at Auburn University. He and his wife, Grace Preiss '70, have three children—Allen Jones, Jr., '78, Jeffrey Jones '85, and Pamela Gail Jones Saia, who attended Auburn.

Hunter C. Foy is principal property appraiser for the Georgia Department of Revenue, and belongs to the Jaycees and Kiwanis. He and his wife, Sue, live in Madison and have two sons, John and David.

Marcus John Lyons, Jr., is engineer for Hoff and Associates in Birmingham. He and his wife, Norma Jo, have two children, Michelle Lyons Rushing '80, and Marcus John Lyons, III, '84.

Sara Warren Morris is director of finance for the City of LaHabra in Calif., where she lives with her husband, Donald Morris '52. She is a member of the Municipal Finance Officers of America and the California Society Municipal Business Tax Association.

Charles S. Phillips and his wife, Mary McNabb '49, live in Birmingham where he is president of C.S. Phillips Co., Inc., a lay preacher in the Methodist Church, and a member of the board of directors of the Christian Service Mission. The Phillipses have a daughter, Murray.

Robert Ap C. Jones is administrative assistant with Selma Housing Authority and a member of the Kiwanis Club and Elks Lodge. He and his wife, Dot, have three children—Laura, James, and Mark.

Harold Edwin Wilson, Jr., and his wife, Patricia, live in Orlando, Fla., where he is chief industrial engineer for Martin Marietta Corp.

1952

James P. Wingo lives in Birmingham with his wife, Nancy. They have two children, Patrick and Nancy '83.

Melvin W. Rush is the business manager for Druid Hills Presbyterian Church in Marietta, Ga. He and his wife, Gloria, have three children—Rhett, Rhonda, and Roxanne.

Wallace C. Weaver of Alexander City is a

district manager for Alabama Power Co. He and his wife, Rubye, have four children—Deborah W. Barton '75, Nanette W. Kirk '79, Susan, a junior at Auburn, and William, a sophomore. Wallace is active in the Lion's Club, Gideons International, and the ASAE.

Joyce Nicholas Williamson lives in Atmore with her husband, Howard. They have one son—Jon Michael Williamson '82.

R. Earl Cambron owns his own insurance firm in Anniston. He and his wife, Virginia, have one son, Earl Cambron, Jr., '75.

J. Marshall Deshields, Jr., is a sales representative with Martha White Foods. He and his wife, Haden Jones '51, live in Winchester, Ky., and have one daughter, Jane.

James R. Reynolds, Jr., DVM, operates Reynolds Animal Clinic in Cleveland, Tenn. He and his wife, Chris, have three children—James, Michael, and Amy, who is a senior at Auburn.

Robert N. Talmage and his wife, Jean, live in Atlanta, Ga. They have six children—Sharon, Robert, Jr., Gretchen, Rachel, Rebecca, and John.

James F. Jordan, DVM, has a practice in Montgomery. He and his wife, Betty Sanders, have two children—Judy J. Crews '80, and James, who is a vet student at Auburn.

Chester P. Neiswender of Pensacola, Fla., has taken early retirement from the Monsanto Corp. and now has a consulting business and an auto repair business called the "Porsche Patch."

L. Denton Cole has recently relocated to Centre from Nashville, Tenn., to assume the position of president of the Cherokee County Bank.

Calvin C. Davis of Gadsden has three Auburn graduates in his immediate family and will soon have a fourth. He and his wife, Inez Hamby '62, have four children—Michael, who attended Auburn for three years; Robin '83; Gaye '79; and Meredith, who is an Auburn junior.

Brig. Gen. James David Randall, Jr., and his wife, Mary Abel '54, live in Brandon, Fla. They have three children, James D., III, '79, Joseph '81, and Mark.

Richard P. Van Dyke has relocated to Jackson, Miss., to become associated with the Mississippi Steel Corp. He and his wife, Daisy, have four children—Lydia, Candi, Peri Beth, and Ricky, who is a member of the University of Kentucky swim team—and five grandchildren.

1953

Conrad E. Adair received his Ph.D. from the University of Alabama in May and is an assistant professor of business and economics at Birmingham Southern College. He retired as superintendent of personnel with U.S. Steel Corp. in 1980 after 32 years of service. He and his wife, Cathryn, have three children—Linda Kyle '75, Karen Stroud '79, and Doug, who is attending law school at the University of Alabama.

Leonard A. Morgan is the manager of technical management systems at General Electric's corporate headquarters in Fairfield, Conn. He has served on the advisory board at the Polytechnic Institute of New York and has been a guest lecturer at MIT. He has also published a number of articles in professional journals. He and his wife, Essie, have two children, Harriet and Leonard.

Col. Douglas L. Hutchens of Stone Mountain, Ga., is a professor of economics at Dekalb College. He retired from the Army in 1978, and is a member of several military organizations, among them the Army Aviation Association of America and the Association of the U.S. Army. He and his wife, Dot, have three children—Adelia, Richard, and Kimberly.

William R. Hill and his wife, Bernice, live in Birmingham, where he is the manager of nuclear support for Southern Company Services, Inc. He is a member of several professional organizations including the IEEE, ANS, and NMA.

Roy L. Salter, Jr., is director of pharmacy services at Alamance County Hospital in Burlington, N.C. He and his wife, Janie, have three children—William, Donald, and Nancy.

Col. John Edward Blue is personnel officer at the U.S. Air Force Headquarters at Wright Patterson AFB, Ohio. He and his wife, Carolyn, have three children—John, Rebecca, and Elaine.

Haim Roitman has been associated with a pharmaceutical fraternity since his retirement. He is recovering from open heart surgery at his home in Phoenix, Ariz.

William T. Donnell is a partner in the architectural firm of Donnell, Froom, and Rogers in Mobile. He is a member of the Alabama Board for Registration of Architects and the National Council of Architecture Registration Boards. He and his wife, Carolyn, have two children, David Donnell '82 and Rebecca.

Dean B. Blankenship of Jacksonville, Fla., is the assistant superintendent for administrative affairs for the Duval County School Board. He is also active with the American Cancer Society, Rotary Club, and the Child Guidance Clinic.

1954

Rubye Wells Weaver and her husband, Wallace Calvin Weaver '52, live in Alexander City. They have three children—Deborah W. Barton '75, Nannette W. Kirk '79, and Susan Weaver, a freshman at Auburn.

Dr. Charles C. Brock and his wife, Frances, live in Murphy, N.C.

Dr. Richard Dale O'Barr is the resident director of the LSU pecan research extension station in Shreveport, La., the only state-supported research station of its kind in the nation. His son, Richard, is a freshman at Auburn in electrical engineering who finished first in his high school class of 327.

Michael A. Piazza has been named assistant works manager at Tennessee Eastman Co., a division of Kodak. A member of the American Institute of Chemical Engineers, he and his wife, Louise, have three children. He had been general superintendent since 1978 and in 1979 was also named director of operation for the Holston Defense Corp.

James D. Murray has recently retired as manager of engineering for the Passavant Corp. in Birmingham. He and his wife, Alice, have three children—James Murray, Jr., '68, Dr. Robert Murray '73, and Eleanor.

Donald E. Dennis is the manager of planning and scheduling for Mobil Oil in Dallas, Tex. He and his wife, Pat, have three sons—Robert Dennis '82, Donald, and David.
